

Chinese Inventions

Until the sixteenth century, Chinese Science was far more developed than European Science,

The Chinese have invented:

black powder, fireworks , Usage for weapons: explosives, flame-throwers, incendiary arrows,

Stirrups: they allow to ride with free hands and therefore to fight on a horse; without that invention no cavalry could have developed...

Suspension bridges made of interlaced bamboos,

Money-paper : printing, paper, the first books were printed on rolls ,

Wheelbarrow

Clocks

Crossbows

Kites

Parachutes

Playing Cards

Compass, cartography, rudders, Chinese were very good seamen ,
