

# Hunting : animals, tools

## Which animals ?

Reindeers : a single animal can feed a whole family for a week. Reindeers live in droves.

Buffalos : to catch them the Men make traps ( holes filled with pointed rods)

Hares, birds

Horses

Mammoths (twice the weight of an elephant), wooly Rhinoceros.

Prehistoric Men first spotted a drove and armed with their weapons went after the cattle, The slowest animal was likely to be their target , they tried to frighten it with loud cries and pushed it towards a trap or a swamp, Then they would kill it with spears,.

Lion of the caves

Bears, wolfs, fox (to make fur coats)

## Which tools ?

Wooden spear with a flint point, flint knife to cut the carcass of animals

Throwers: made out reindeer antlers they would help to send a spear further than 30 meters very quickly,

Bolas :stones attached at the end of a rope they allow the rope to be wound round the legs of animals like a lasso.

Snares :to catch small animals.
