

30 fiches pour la
maternelle et le cycle 2

Découverte du monde

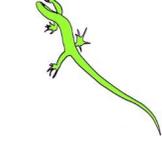

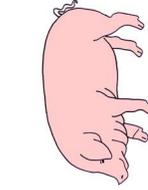

LES ANIMAUX

- Classer les animaux selon
leurs caractéristiques physiques
et leur embranchement

- Acquérir des connaissances
sur leur milieu, leur mode de
vie et leurs comportements

Les animaux

Fichier créé par Anne-Marie Samoun annemariesam@free.fr

A travers le thème des animaux, les enfants vont développer leur sens de l'observation en réalisant différents classements. Ils aborderont la notion de vivant, et pourront acquérir des connaissances sur l'alimentation, les milieux de vie et les comportements des animaux.

Ce fichier comprend différents niveaux de difficultés et s'adapte à de jeunes enfants. Les fiches sont un outil d'apprentissage comme d'évaluation, elles peuvent être faites en groupe avec l'enseignante ou être données une fois que les enfants ont déjà intégré différentes informations.

SOMMAIRE

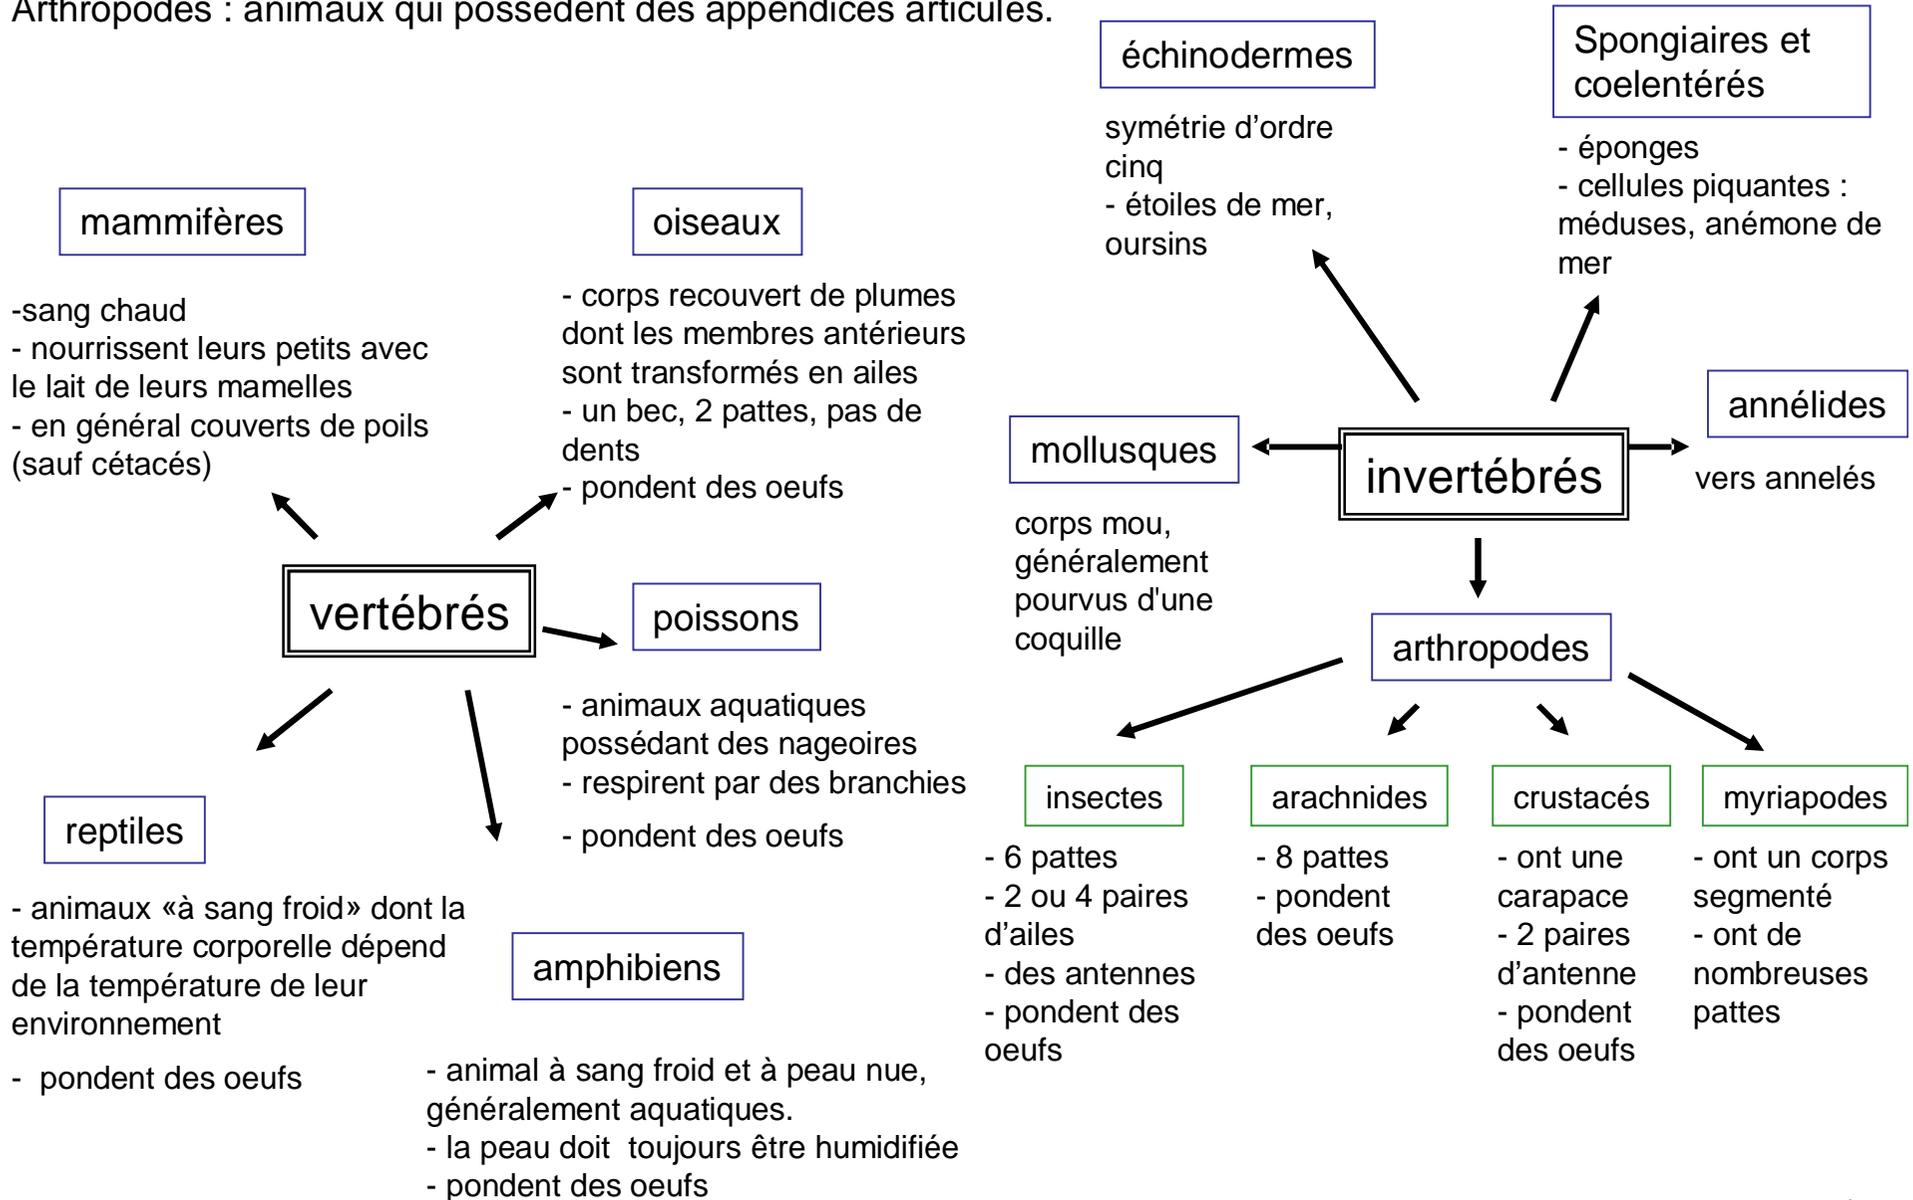

- | | |
|---|--|
| 1- Récapitulatif simplifié de la classification des animaux | 18- Mammifères marins/poissons |
| 2- Animal avec pattes/sans patte | 19- Les crustacés |
| 3- Classement en fonction du nombre de pattes | 20- Les animaux qui se déplacent vite |
| 4- Classement poils/plumes/peau lisse | 21- Animaux qui hibernent |
| 5- Animaux qui ont une carapace | 22- Animaux qui vivent le jour/la nuit |
| 6- Animaux qui ont un squelette | 23- Animaux qui pondent des œufs |
| 7- 8 Animaux qui vivent dans la mer | 24- Animaux omnivores |
| 9- Animaux qui vivent dans les pays froids | 25- Herbivores |
| 10- Animaux qui vivent dans une ferme en Europe | 26- Carnivores |
| 11-13 Classification des animaux | 27- Qui mange qui ? |
| 14- Les oiseaux | 28- Chaîne alimentaire |
| 15- Les mammifères | 29- Animaux dangereux pour l'homme |
| 16- Les insectes | 30- Espérance de vie des animaux |
| 17- Les reptiles | 31- Espèces menacées par l'homme |
| | 32- Réponses |

Le classement des animaux

On classe d'abord les animaux en 2 branches : les vertébrés, animaux qui possèdent un squelette et les invertébrés (animaux qui ne possèdent pas de squelette).

Arthropodes : animaux qui possèdent des appendices articulés.

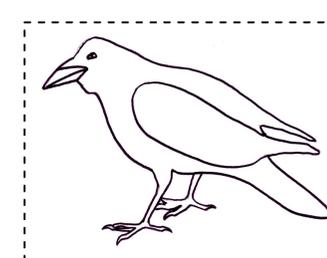

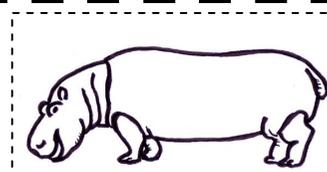

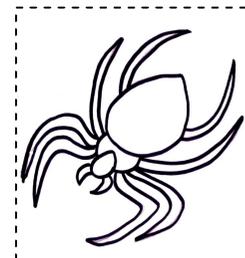

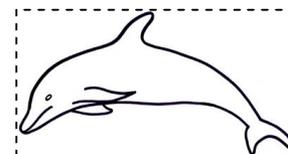

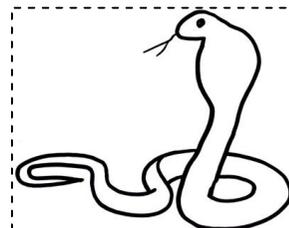

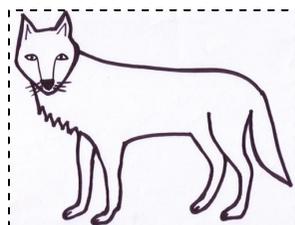

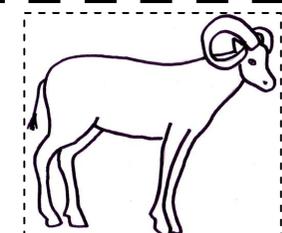

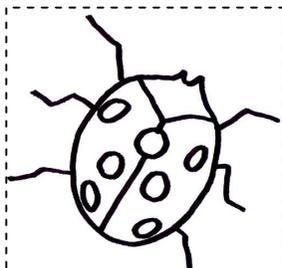

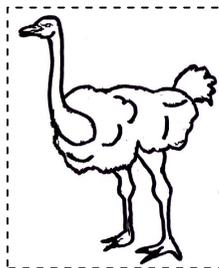

Colorie d'une couleur les animaux qui ont des pattes et d'une autre couleur ceux qui n'en ont pas.

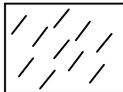

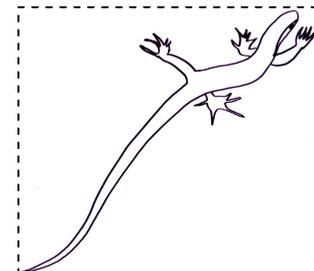

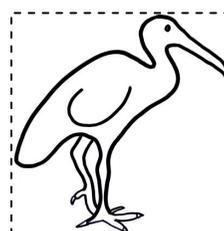

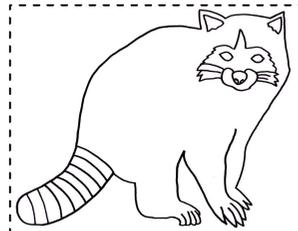

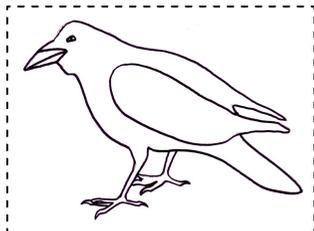

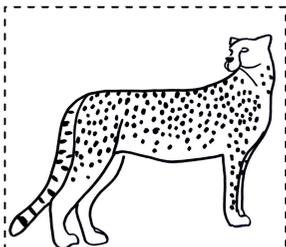

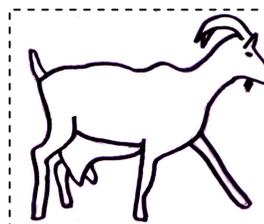

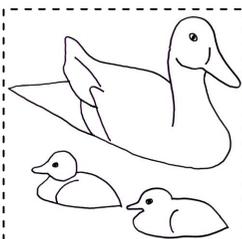

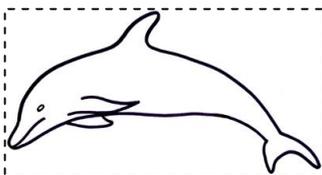

Classe les animaux en fonction de leur nombre de pattes.

0 patte	2 pattes	4 pattes	6 pattes	8 pattes

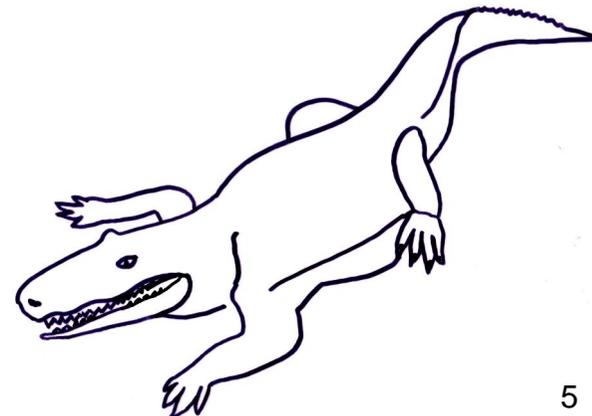

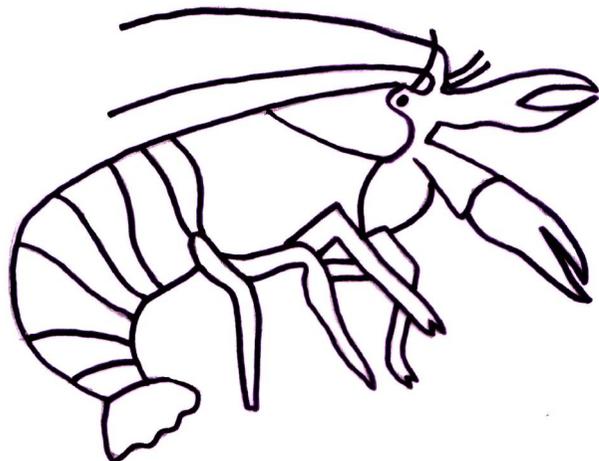

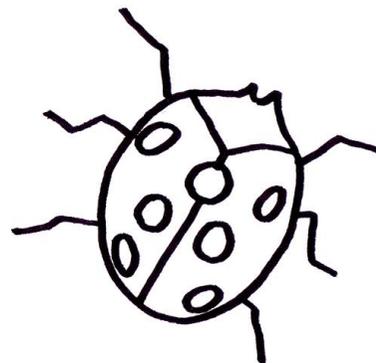

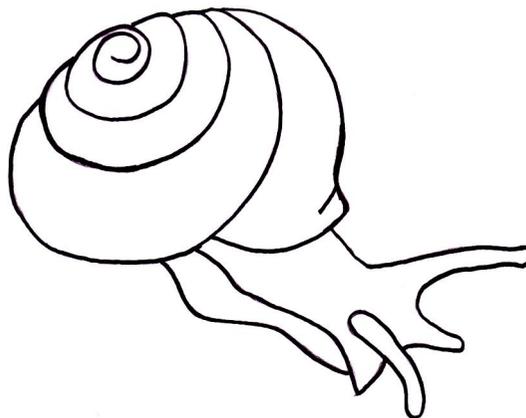

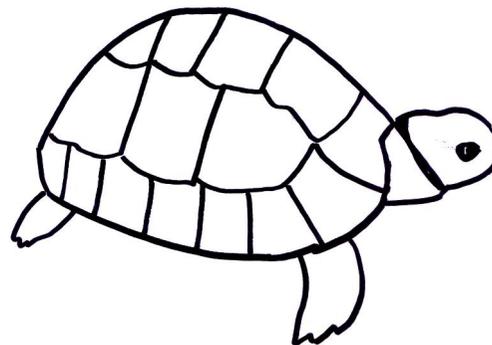

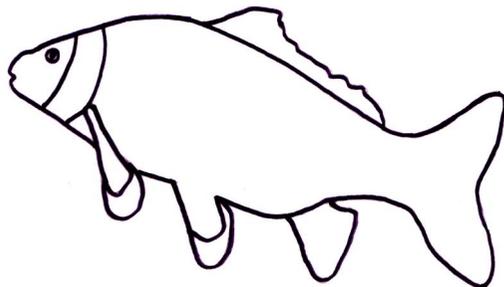

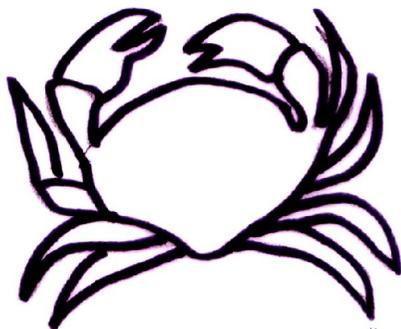

Classe les animaux selon qu'ils aient des poils, des plumes ou la peau lisse.

		
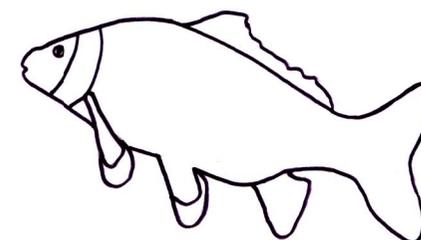

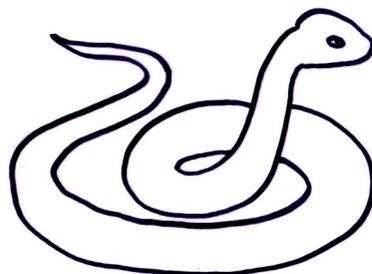

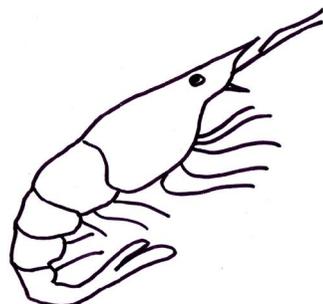

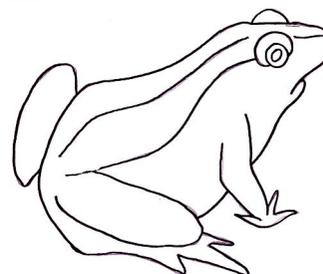

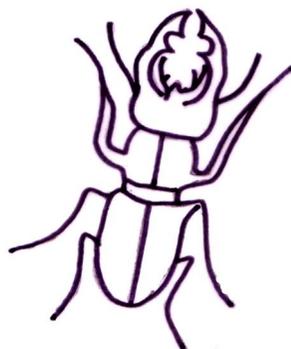

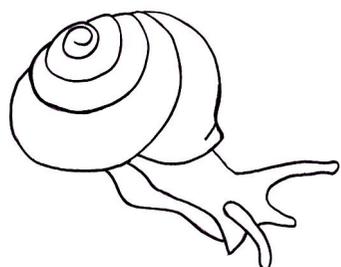

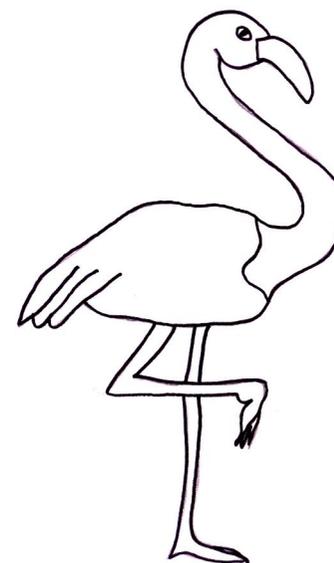

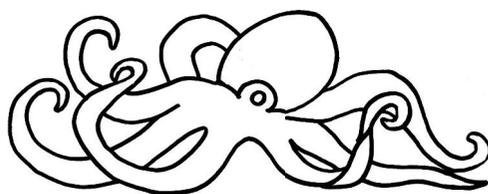

---	---	---

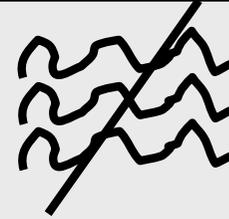

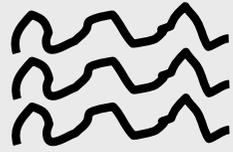

Colorie les animaux qui ont une carapace.

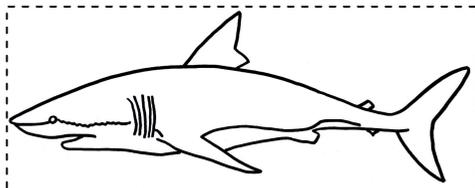

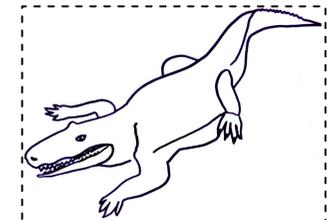

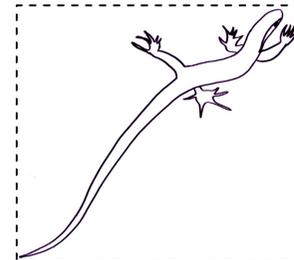

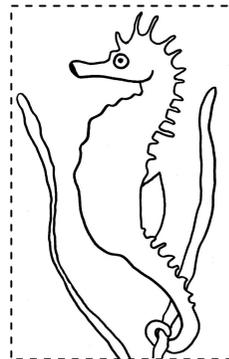

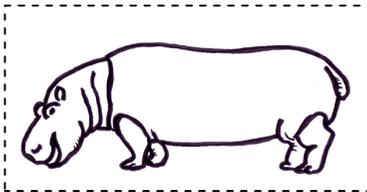

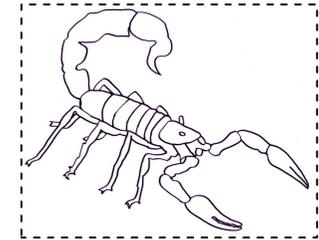

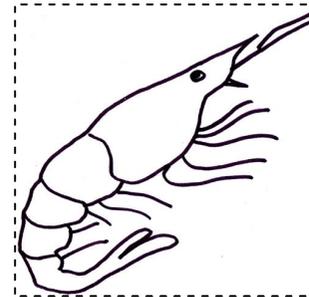

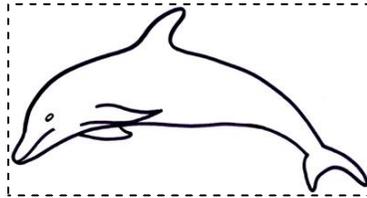

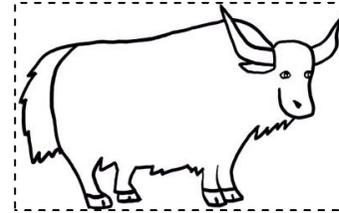

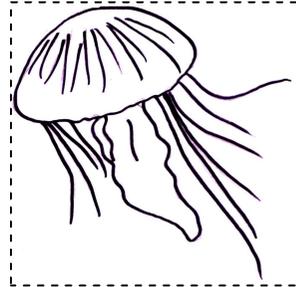

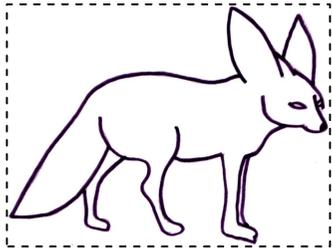

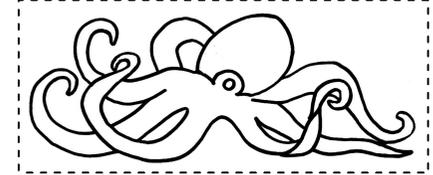

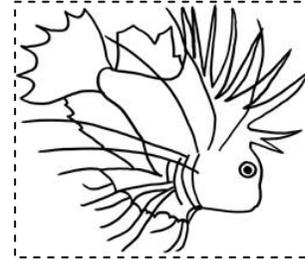

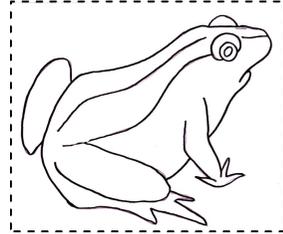

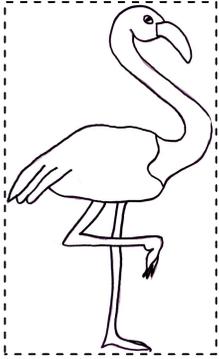

Colorie les animaux qui ont un squelette.

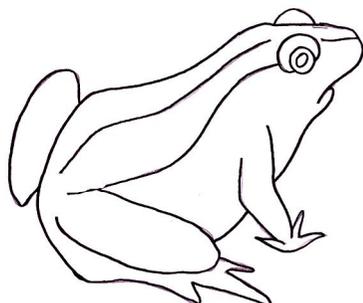

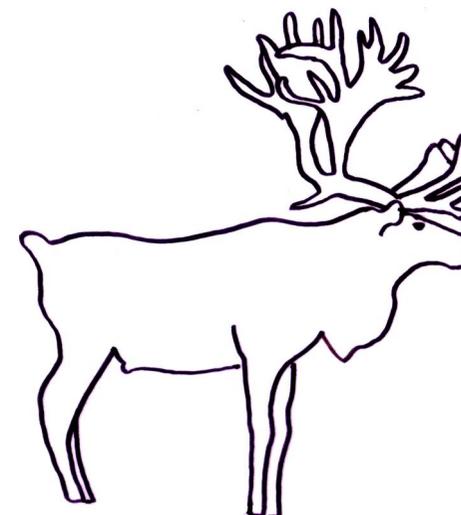

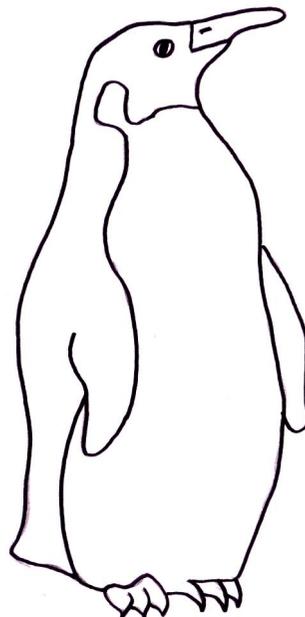

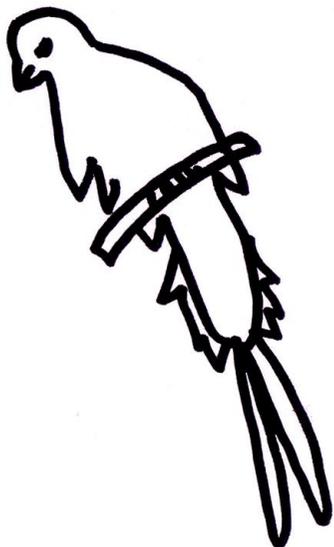

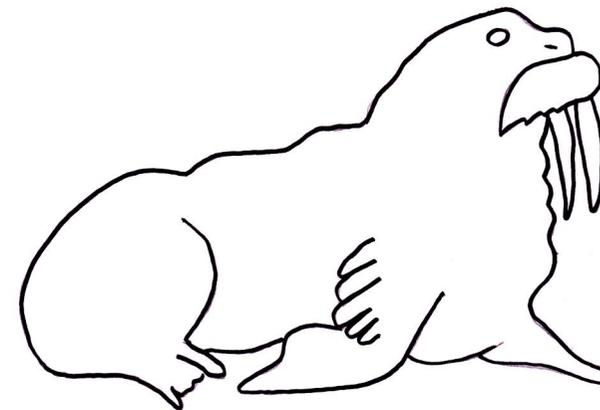

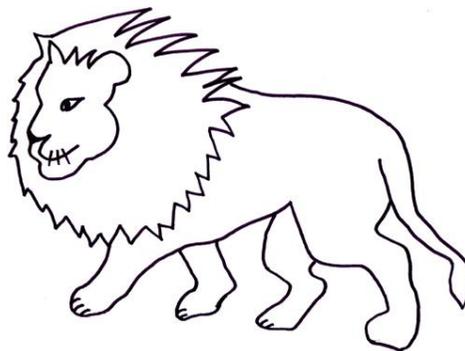

Colle à gauche les animaux qui vivent dans la mer et à droite les autres (voir fiche suivante).

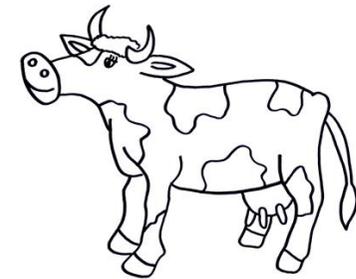

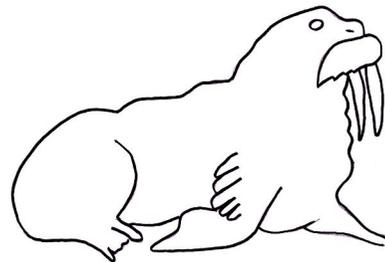

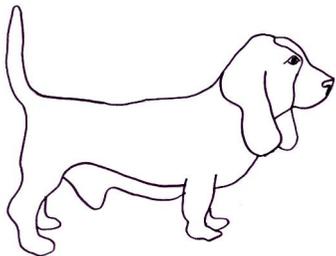

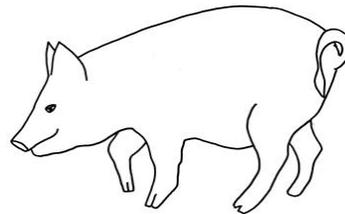

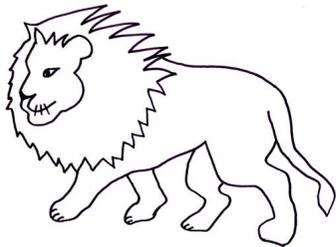

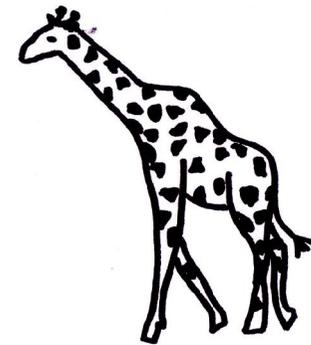

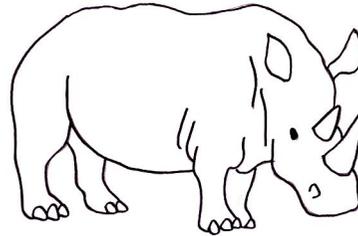

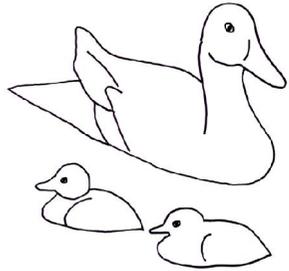

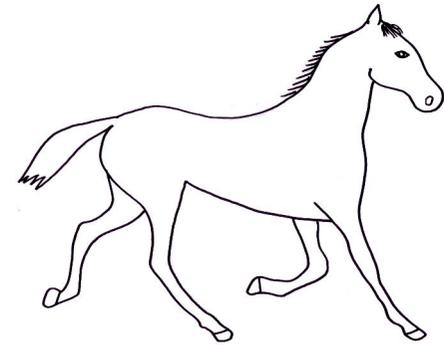

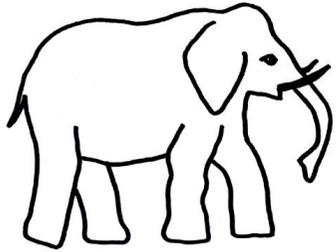

Découpe les animaux et colle les sur la fiche précédente.

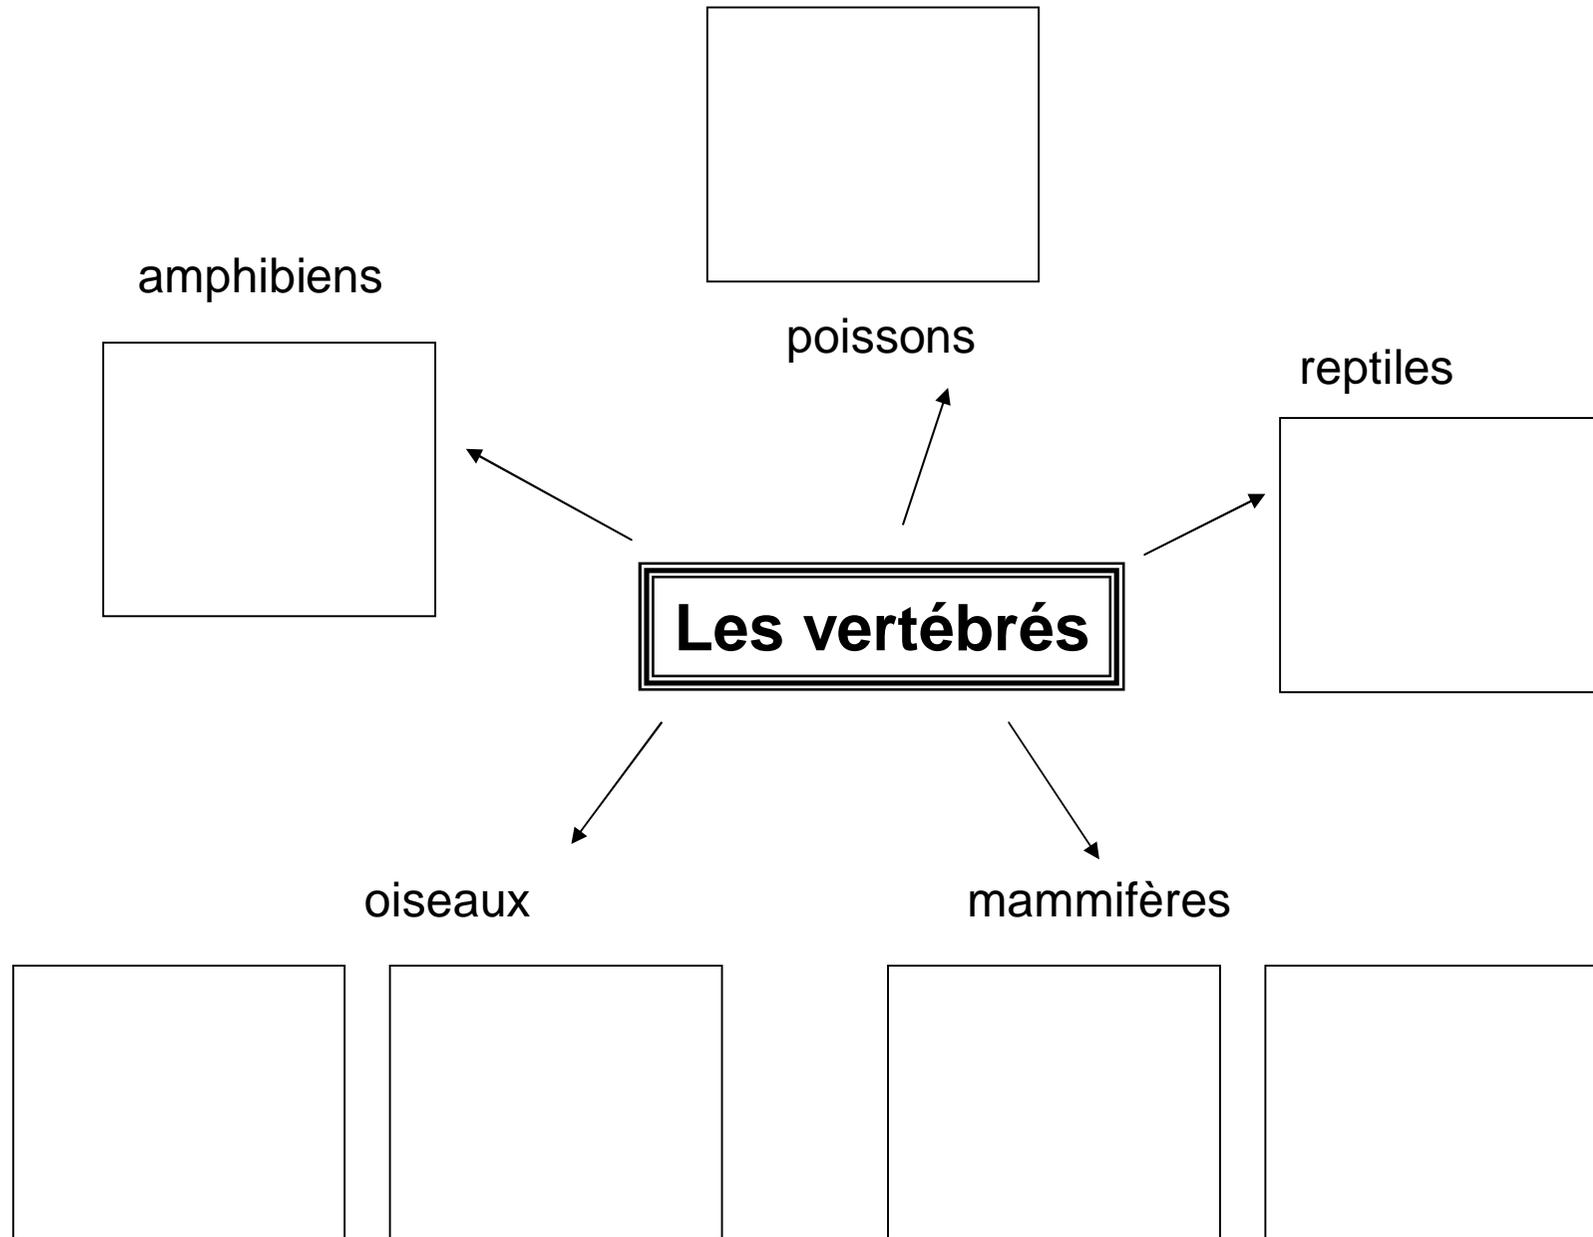

Colorie les animaux qui vivent dans les pays froids

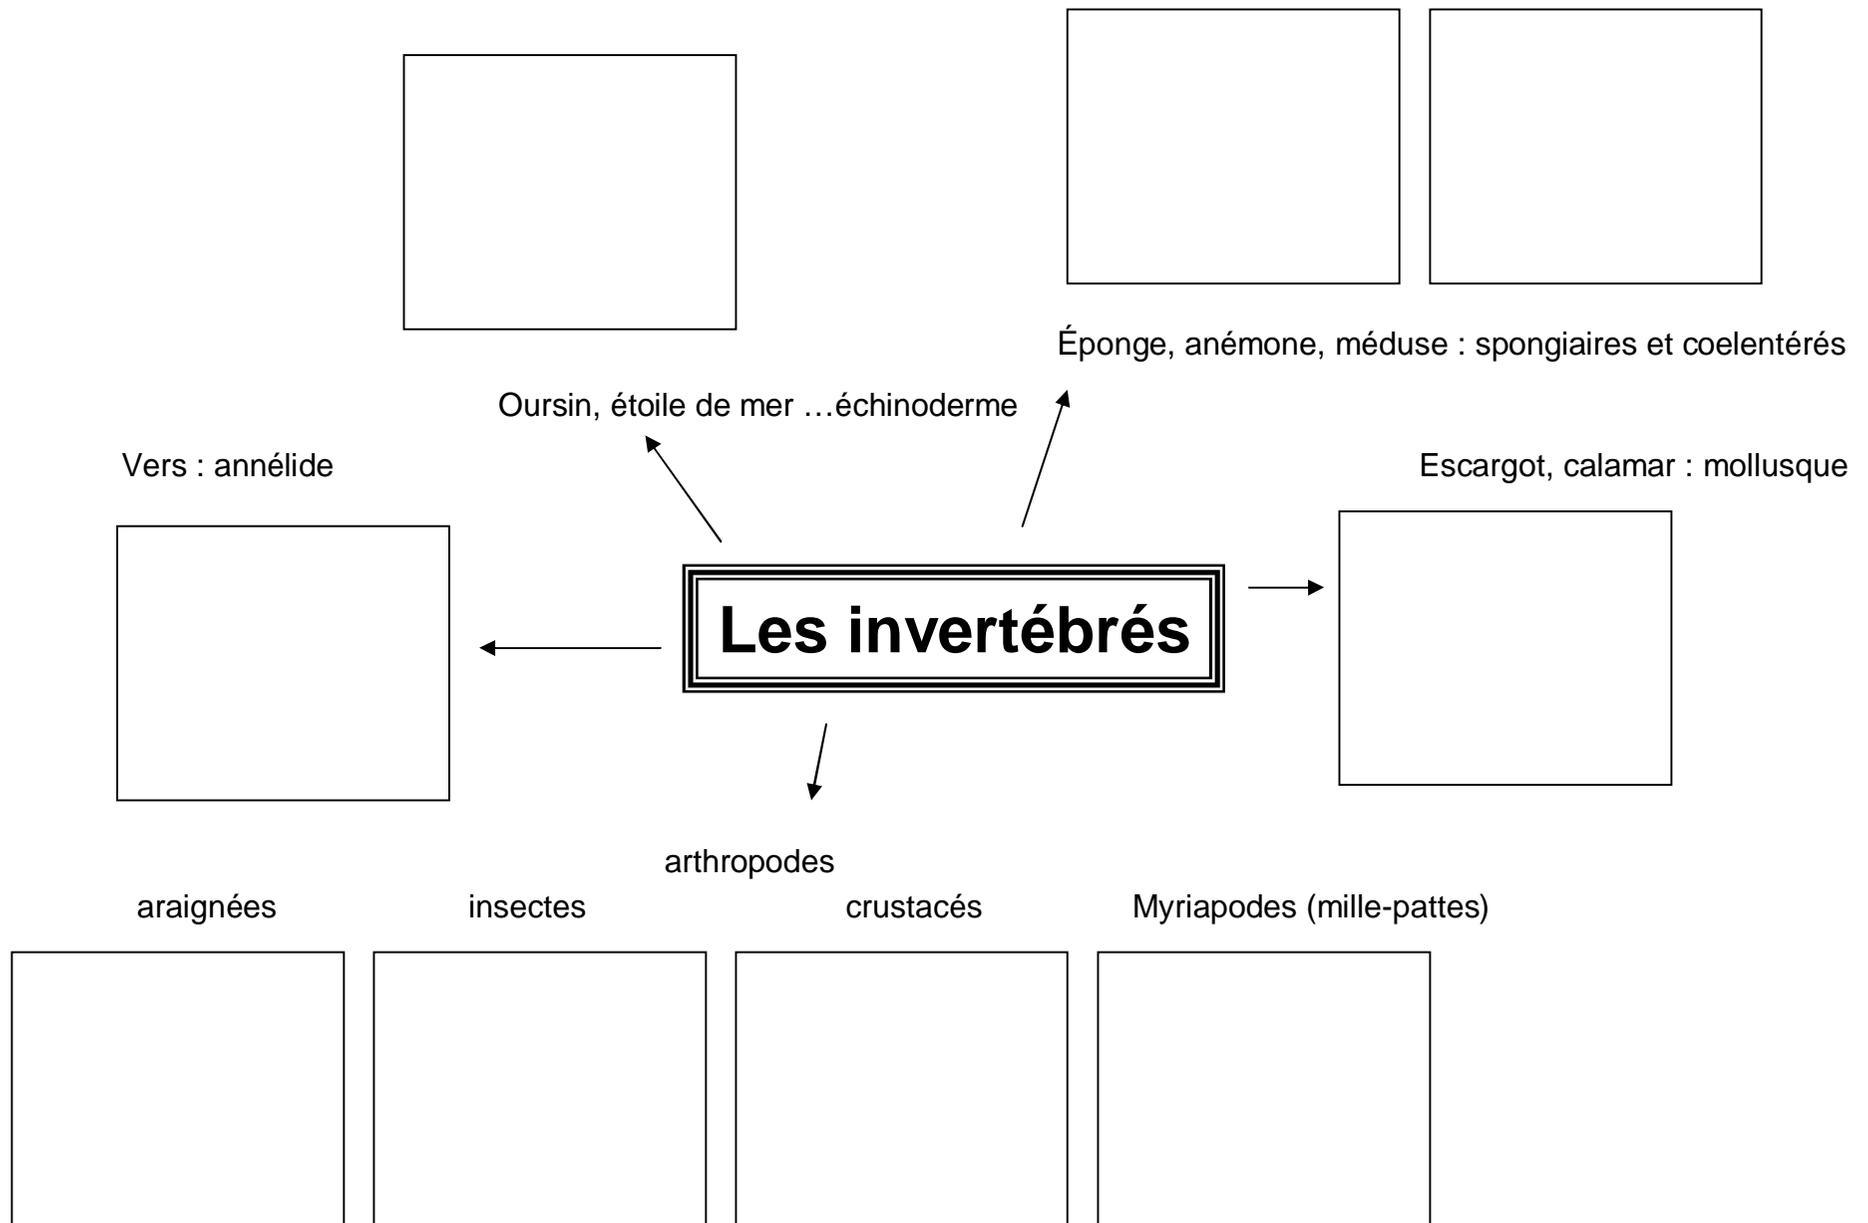

Colorie les animaux que l'on trouve dans une ferme en Europe.

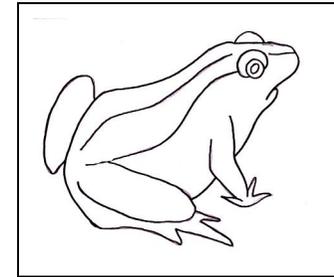

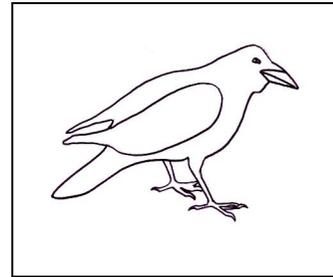

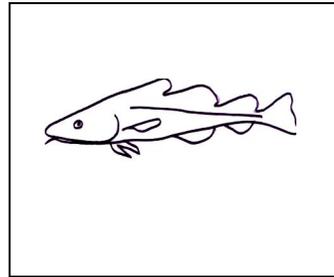

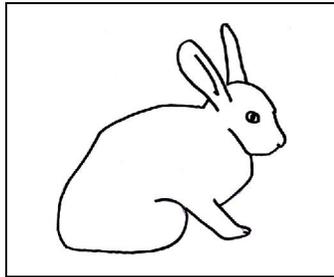

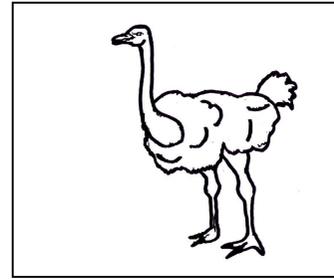

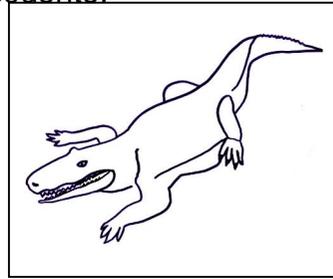

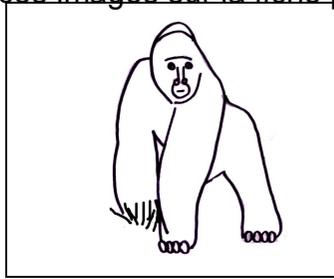

Complète le schéma en découpant les images de la fiche 14 et en les collant à la bonne place.

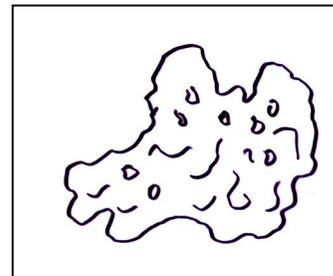

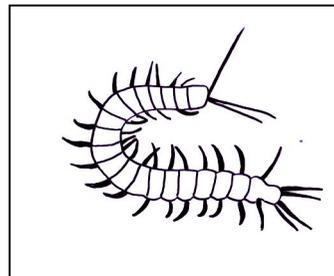

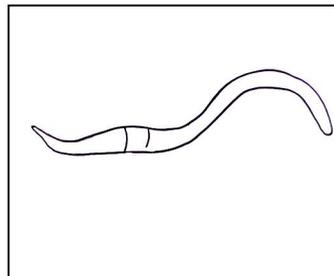

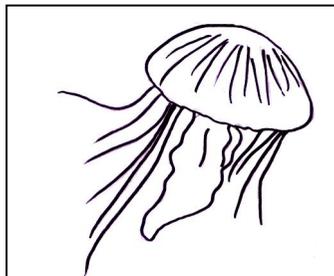

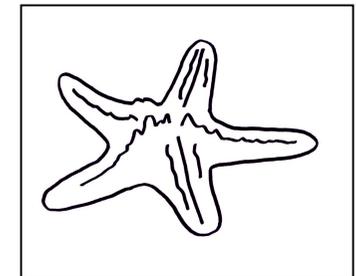

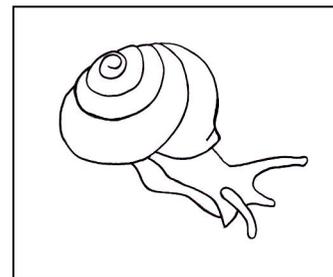

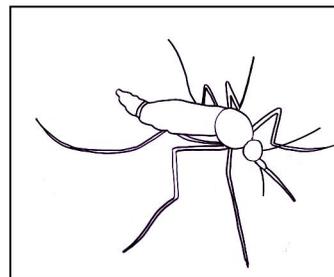

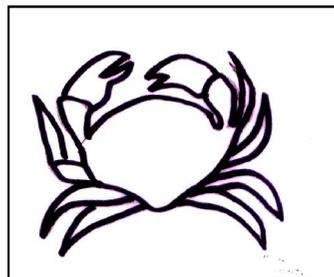

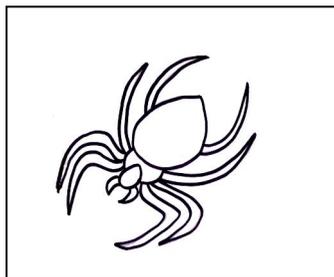

Complète le schéma en découpant les images de la fiche suivante et en les collant à la bonne place.

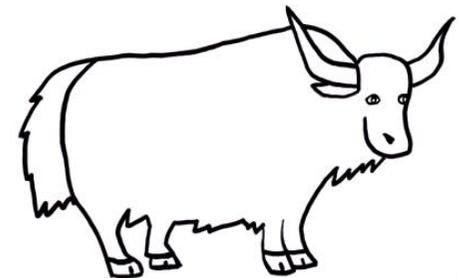

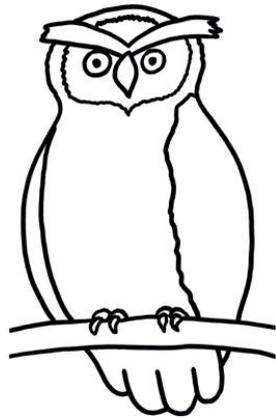

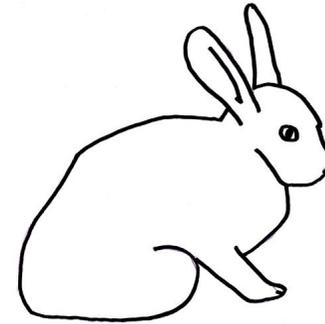

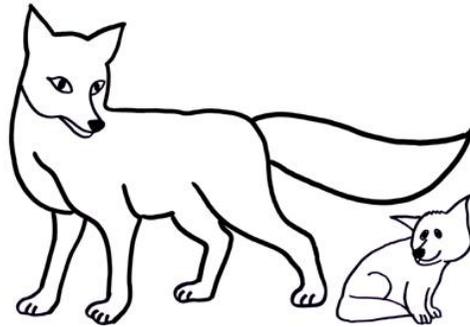

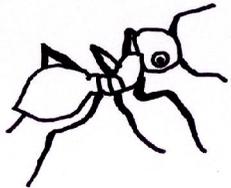

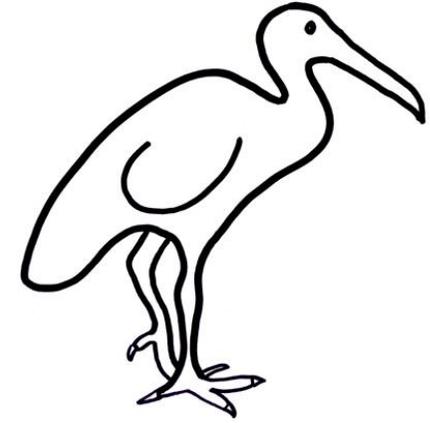

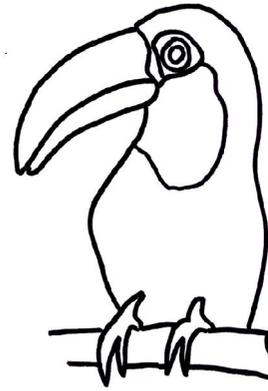

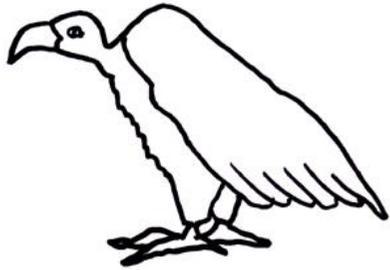

Colle ces images sur la fiche précédente.

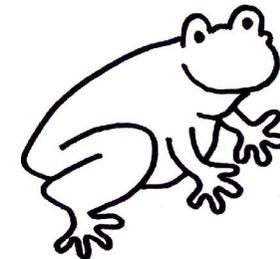

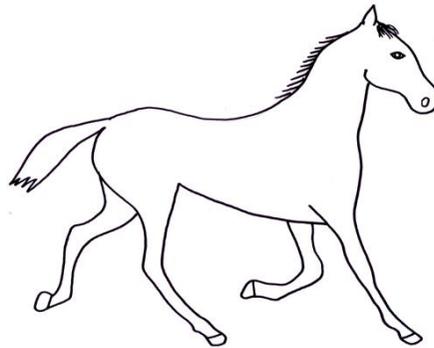

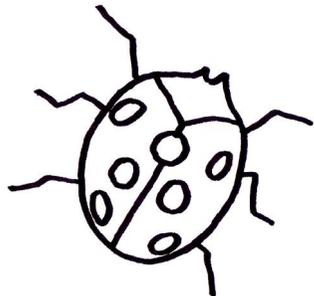

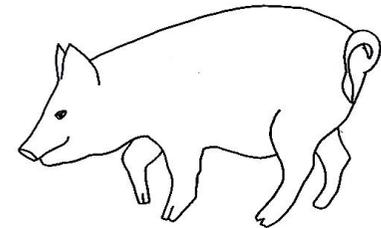

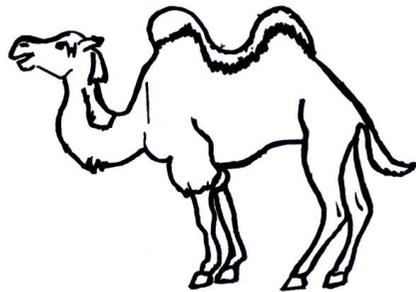

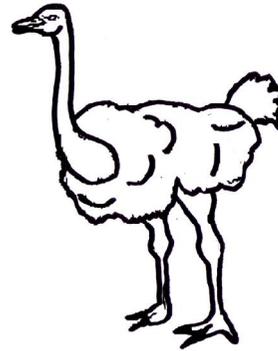

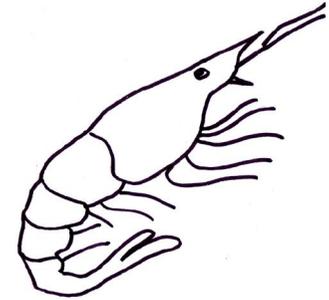

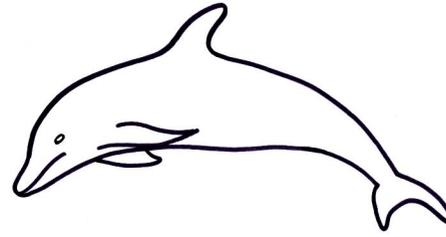

Colle ces images sur la fiche précédente.

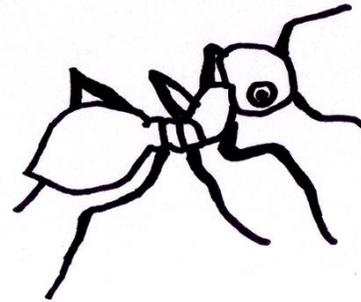

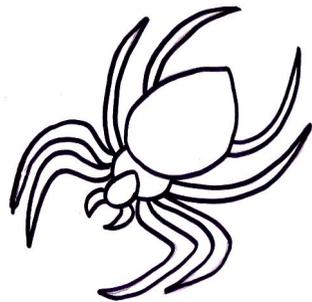

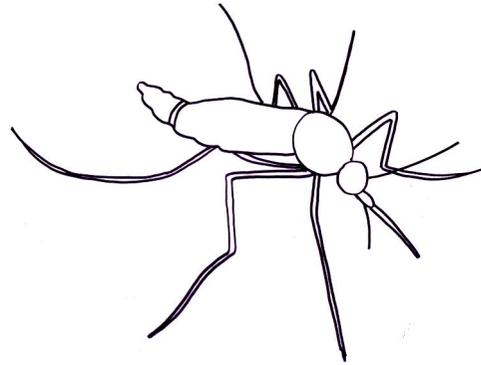

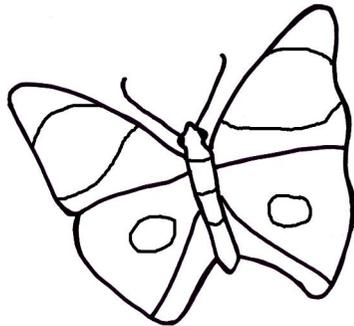

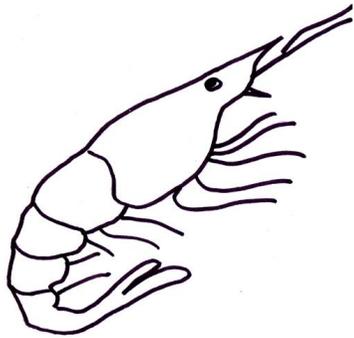

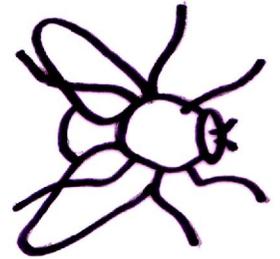

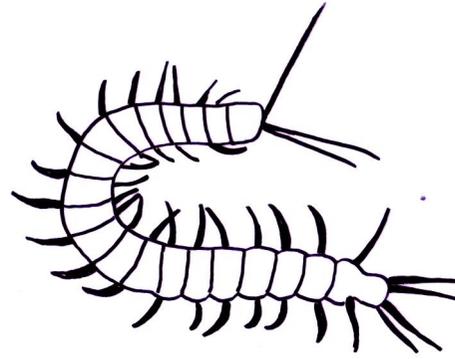

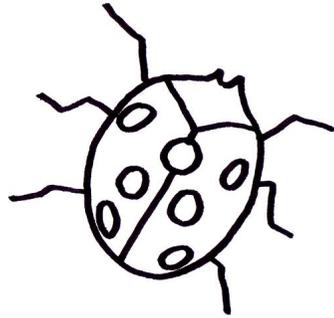

Colorie seulement les oiseaux.

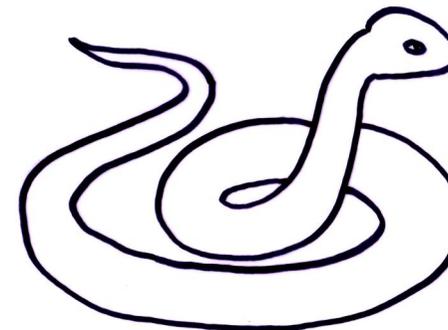

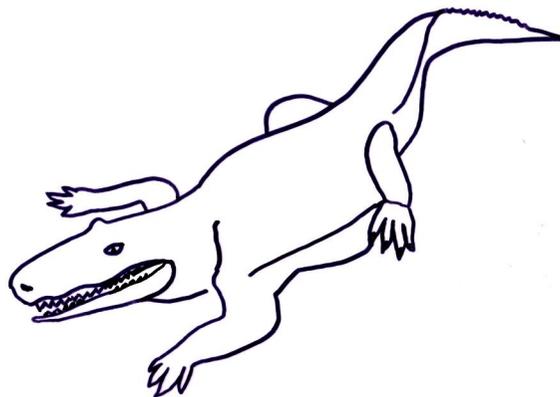

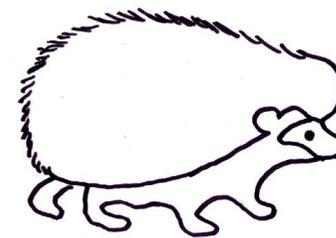

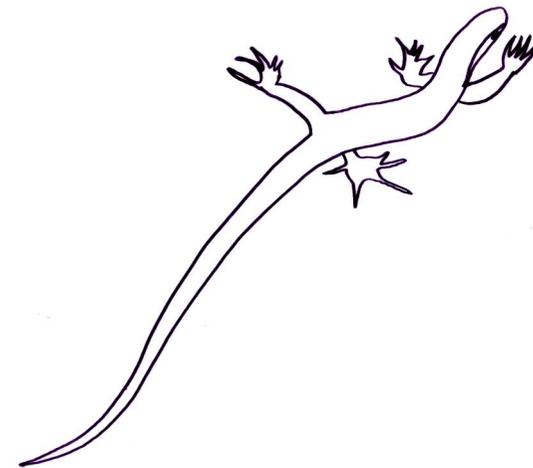

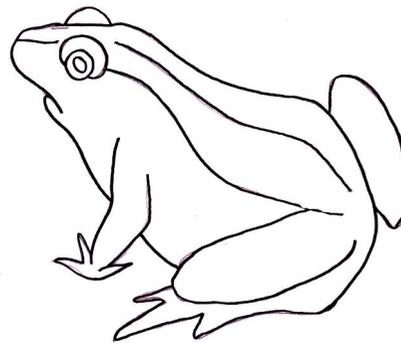

Colorie seulement les mammifères.

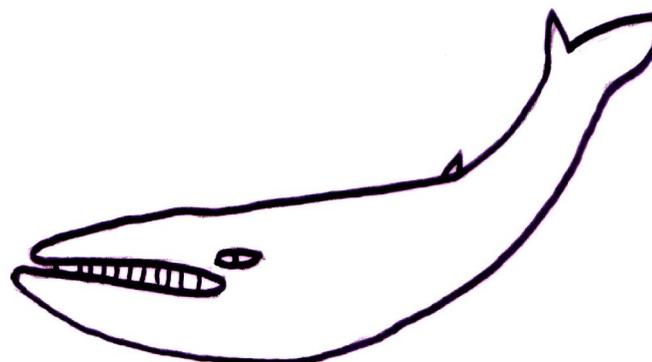

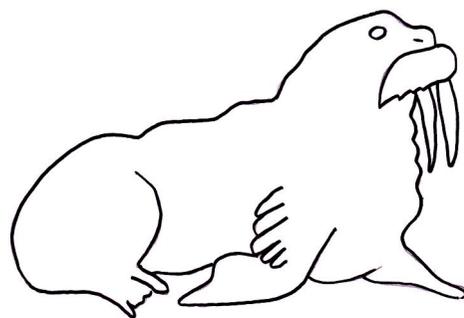

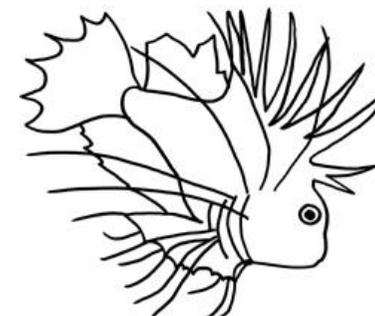

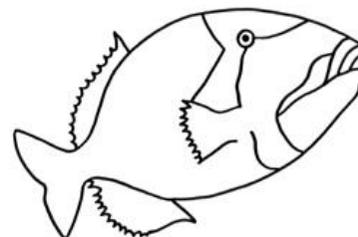

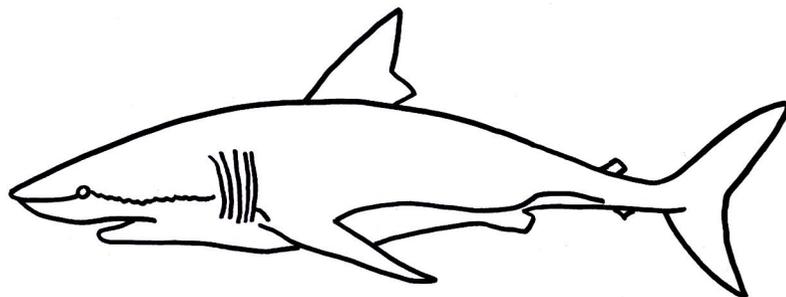

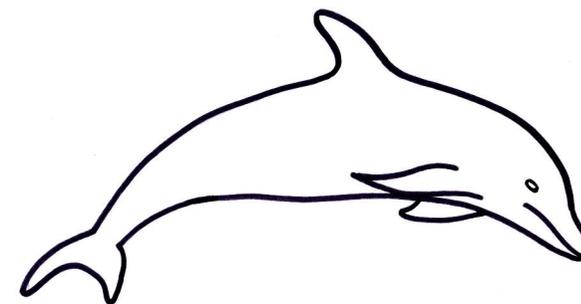

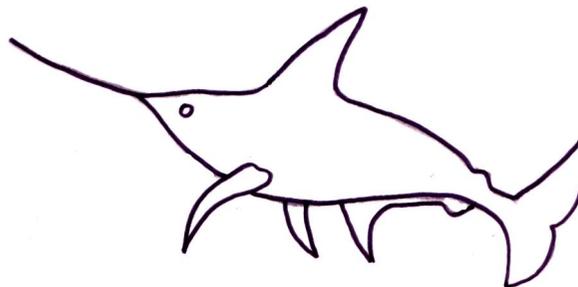

Colorie seulement les insectes.

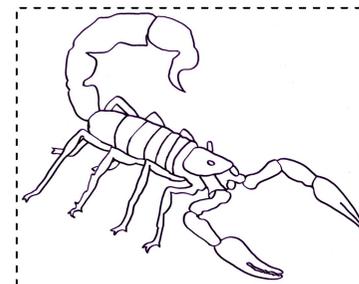

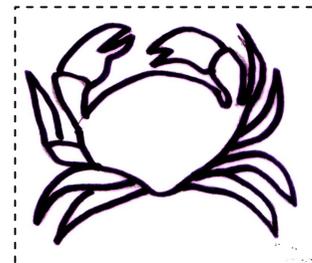

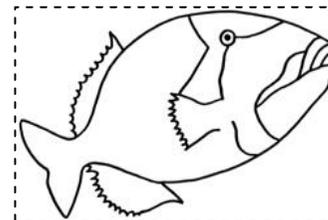

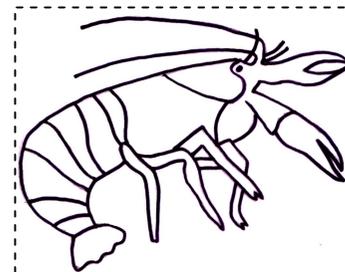

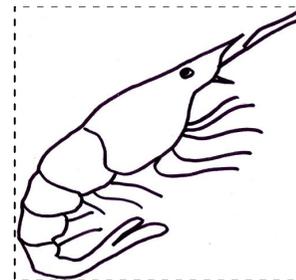

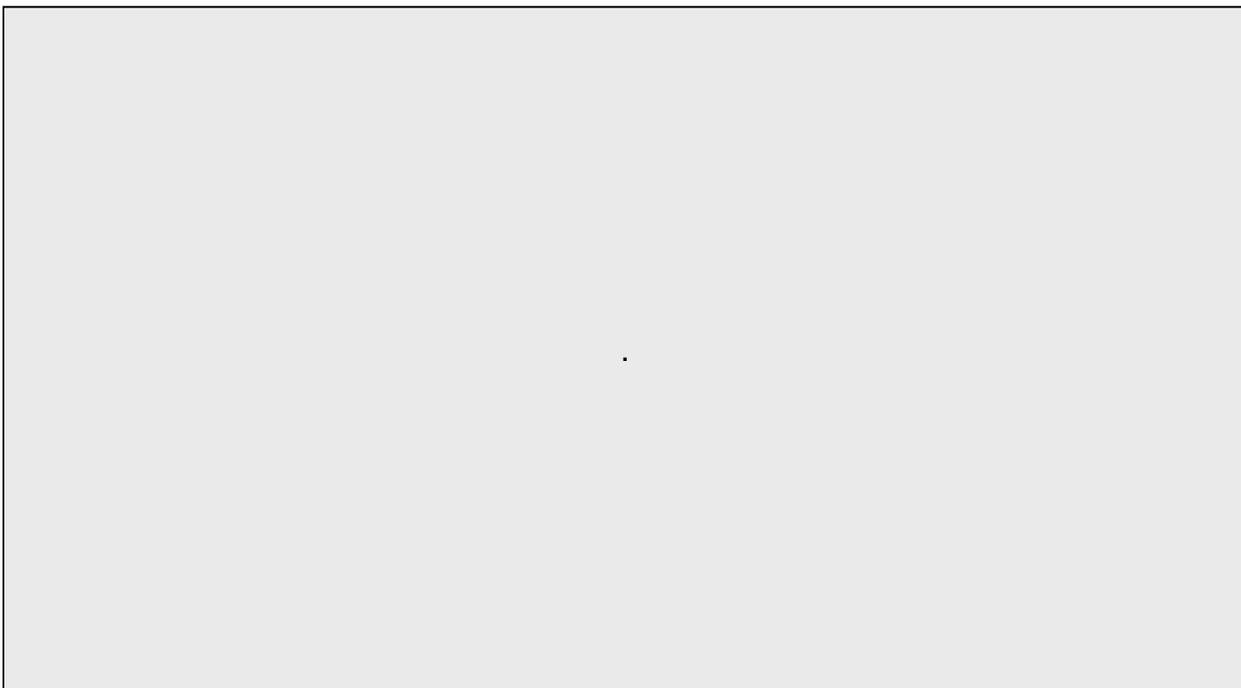

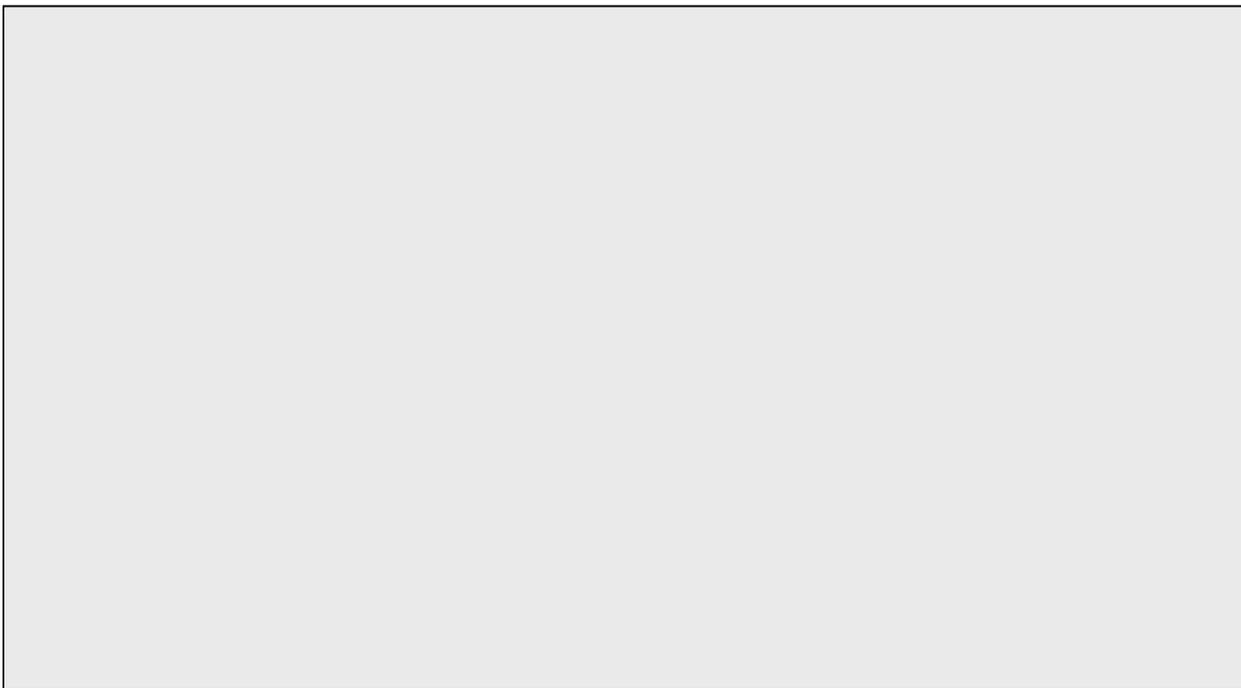

Colorie seulement les reptiles.

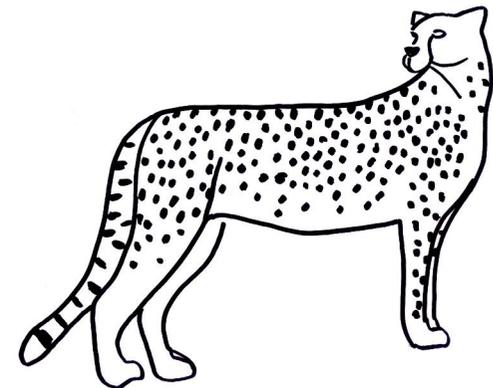

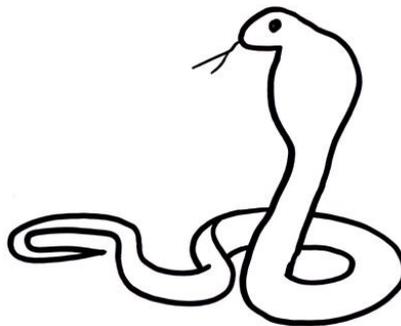

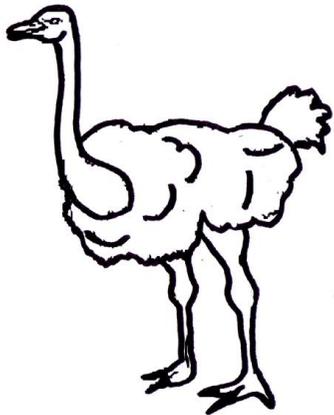

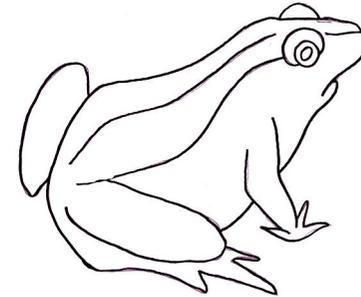

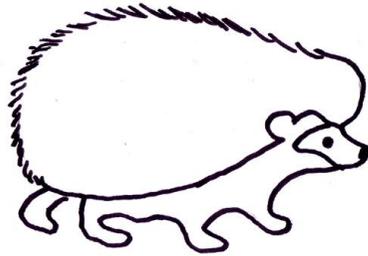

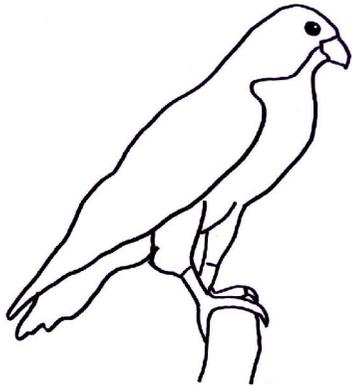

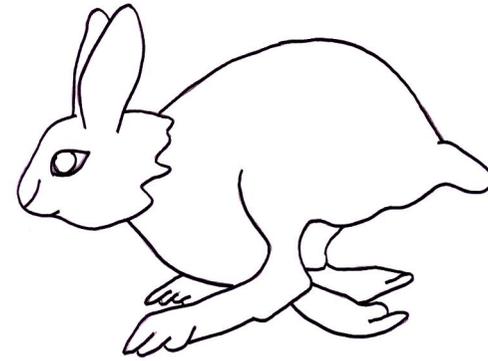

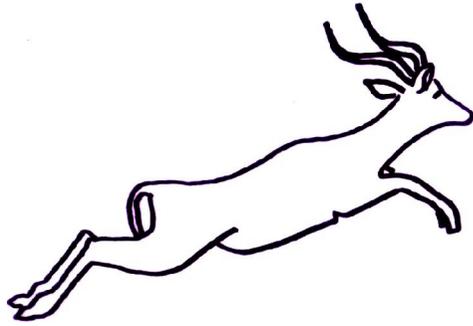

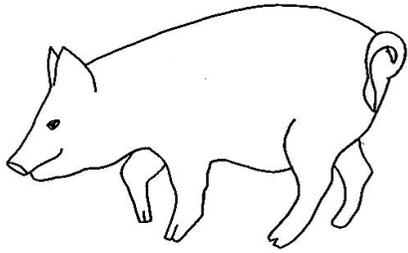

Colorie les mammifères marins d'une couleur et les poissons d'une autre.

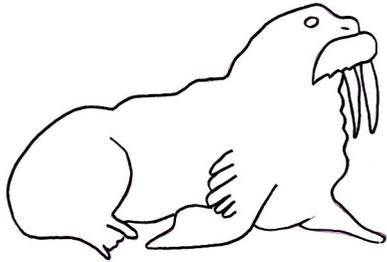

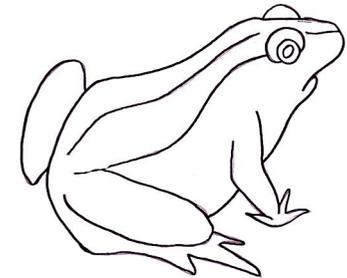

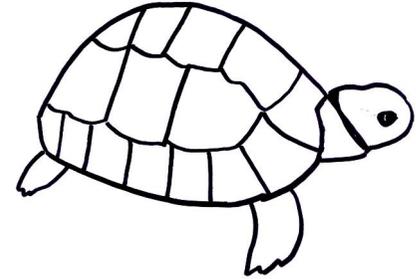

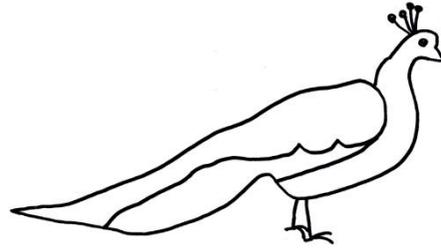

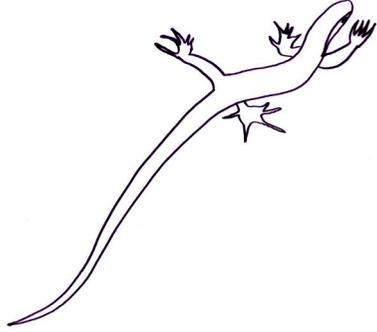

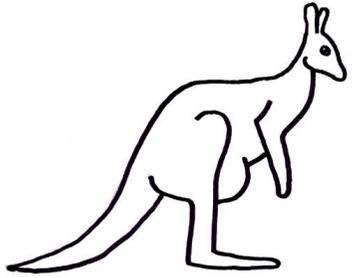

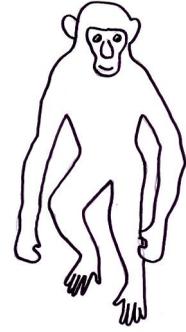

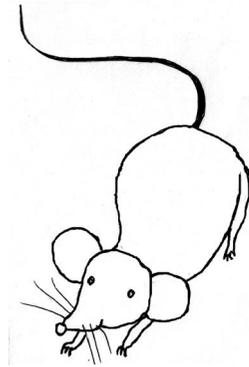

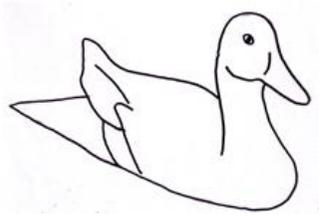

Colle en haut les crustacés et en bas les autres animaux.

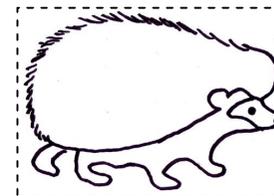

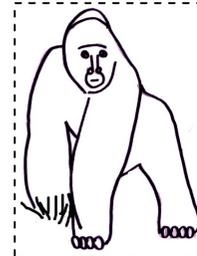

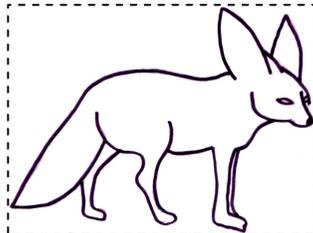

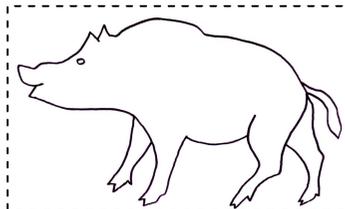

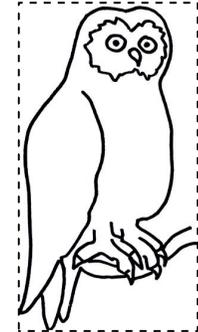

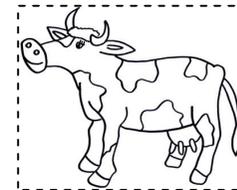

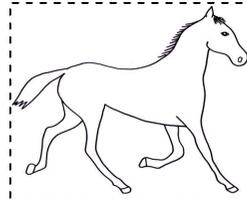

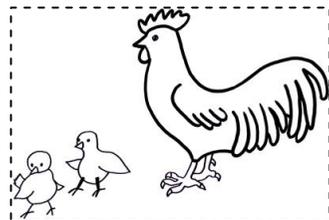

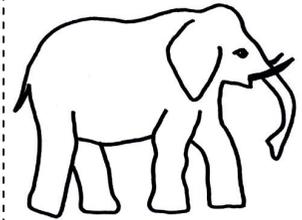

Colorie les animaux qui se déplacent vite.

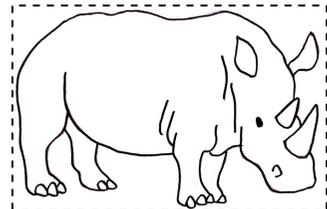

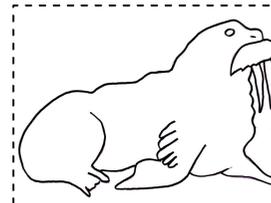

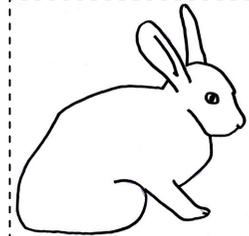

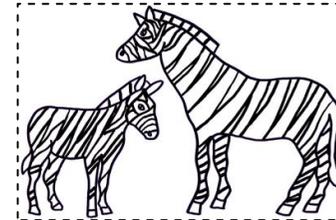

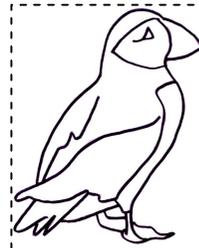

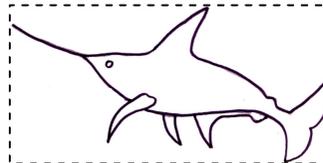

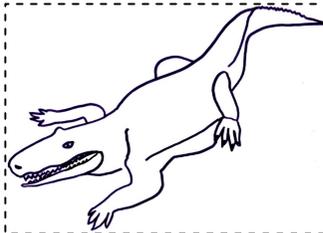

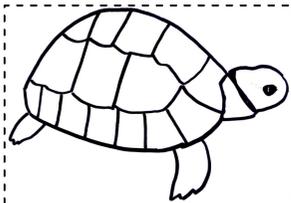

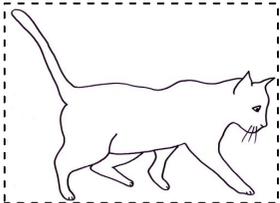

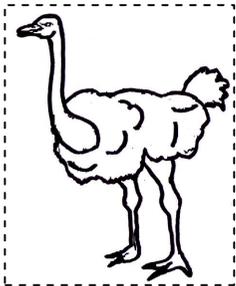

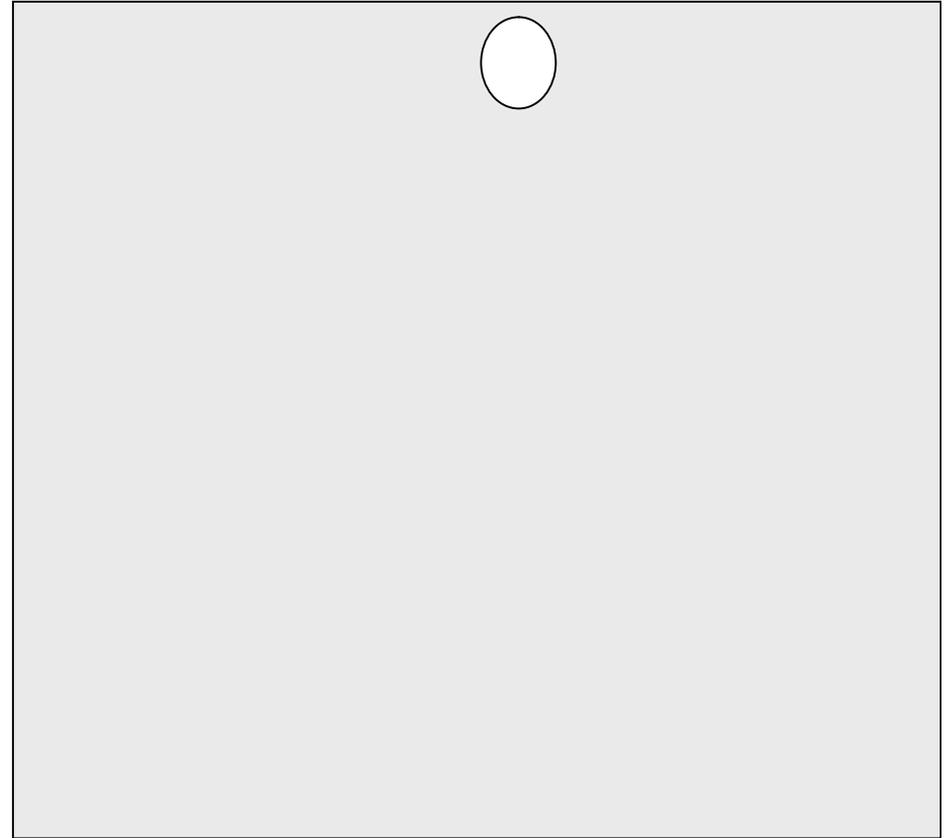

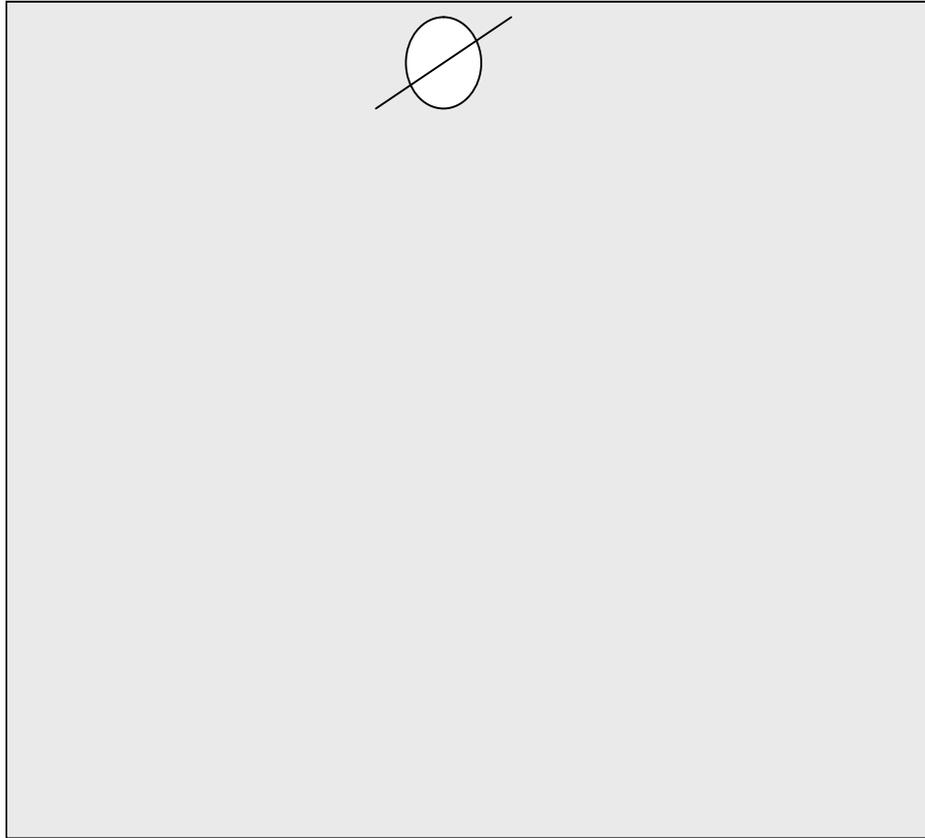

Colorie les animaux qui hibernent.

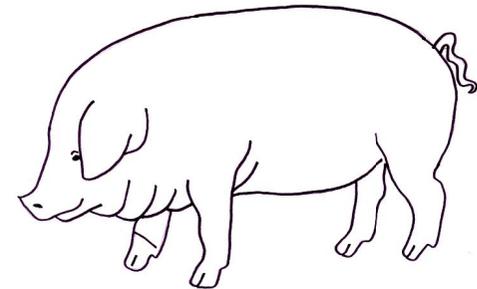

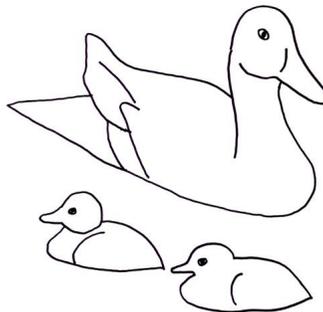

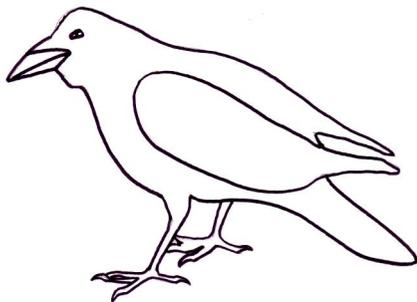

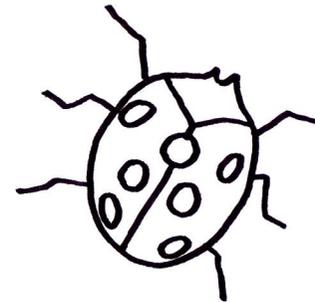

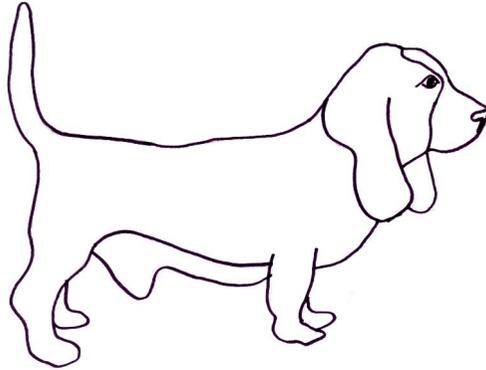

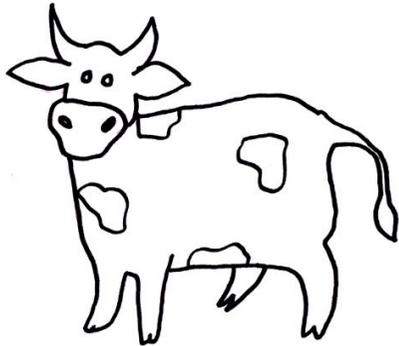

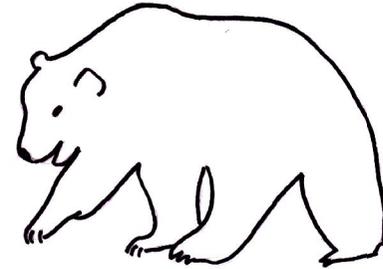

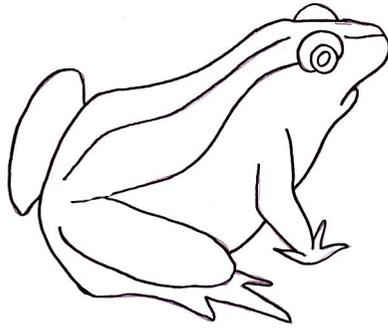

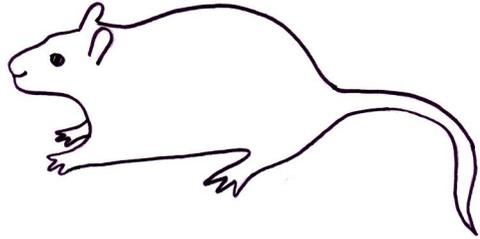

Colle les animaux qui vivent la nuit dans le carré qui a la lune, et ceux qui vivent le jour dans le carré qui a le soleil.

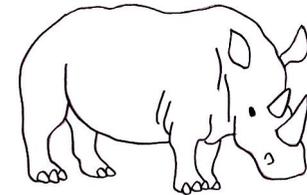

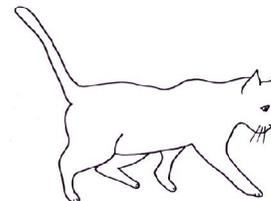

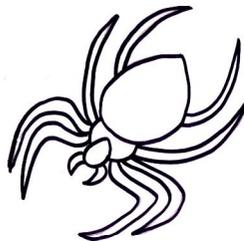

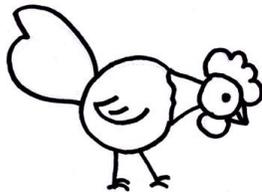

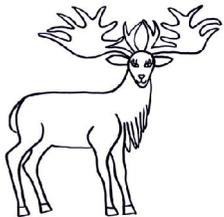

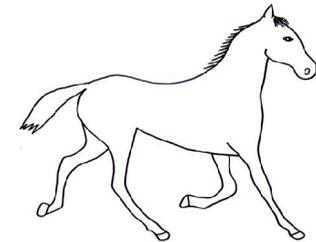

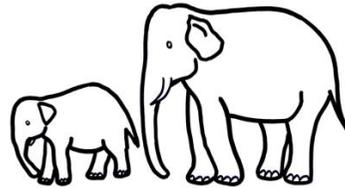

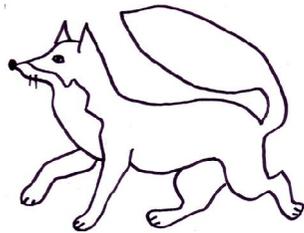

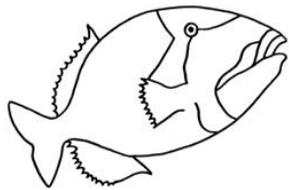

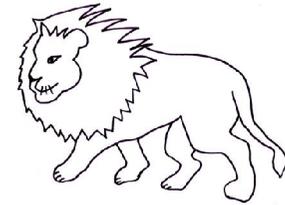

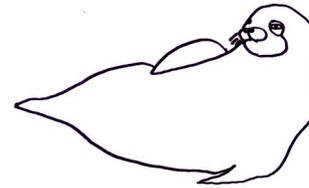

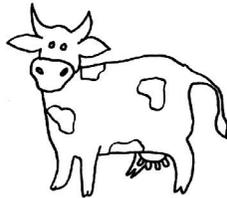

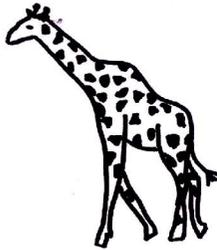

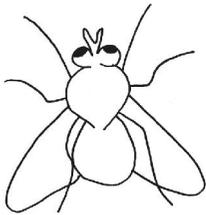

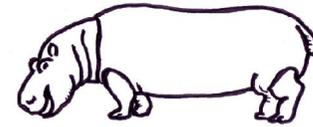

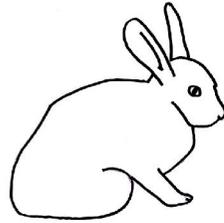

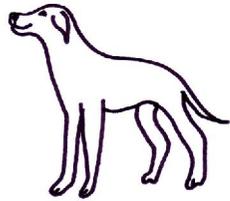

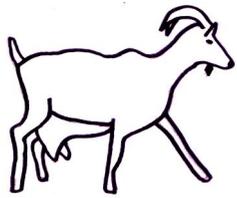

Colle à droite les animaux qui pondent des œufs et à gauche les autres.

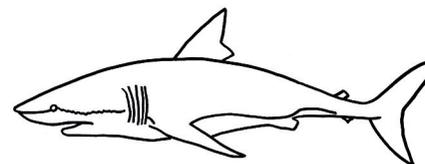

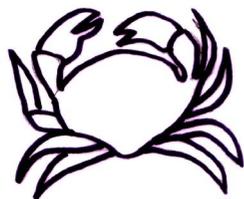

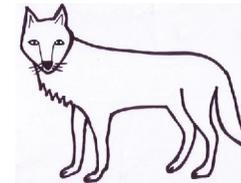

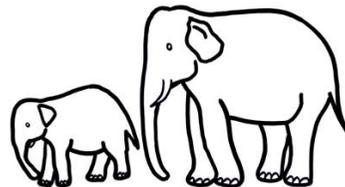

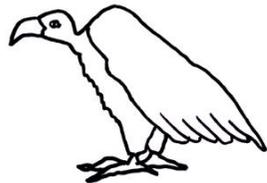

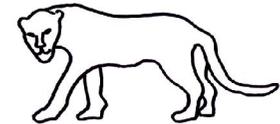

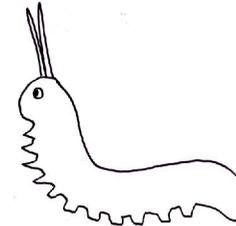

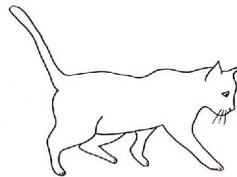

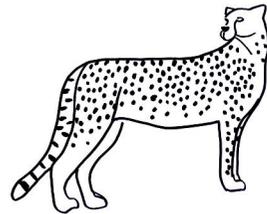

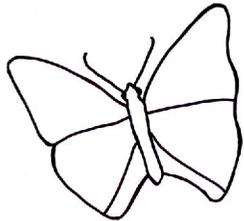

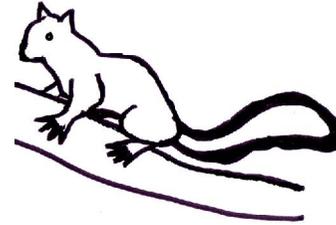

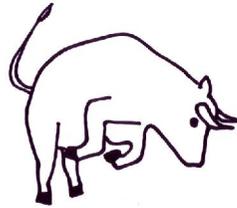

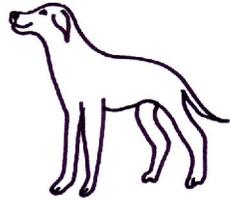

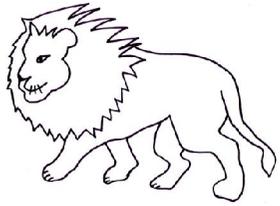

Colorie les animaux omnivore.

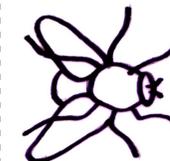

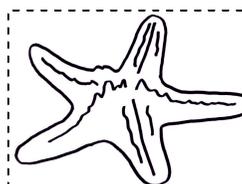

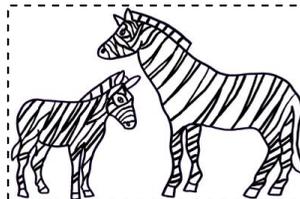

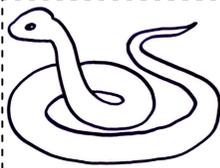

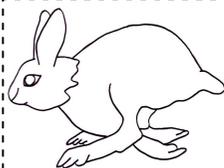

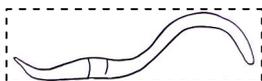

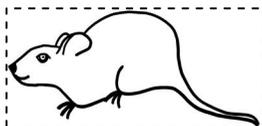

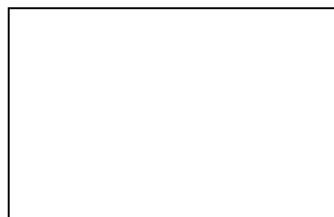

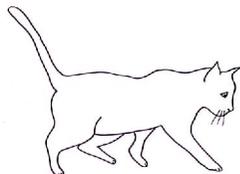

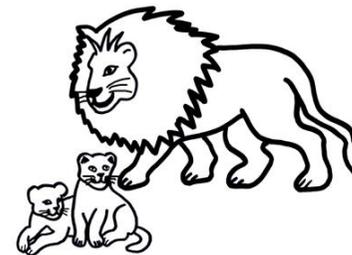

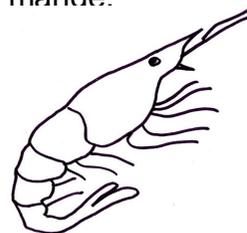

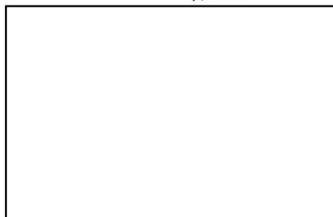

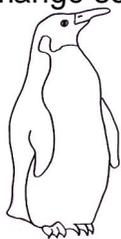

Entoure sur chaque ligne les herbivores.

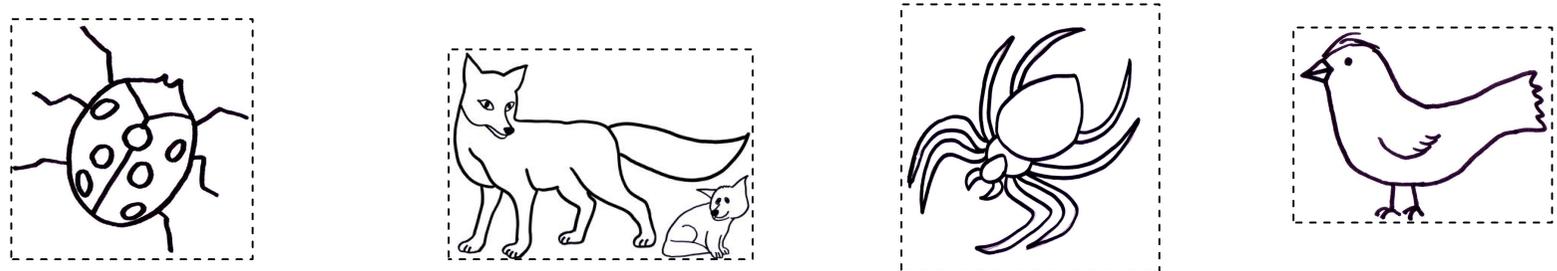

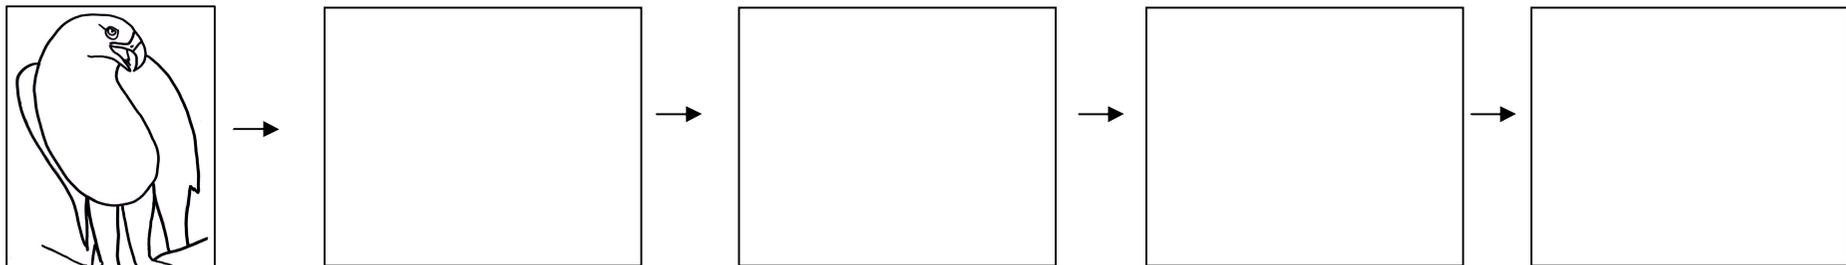

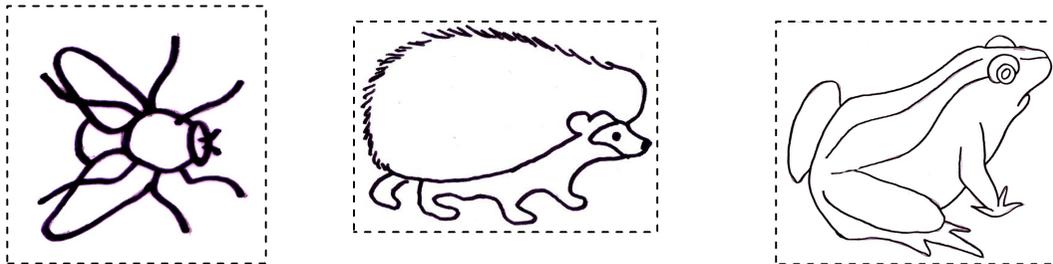

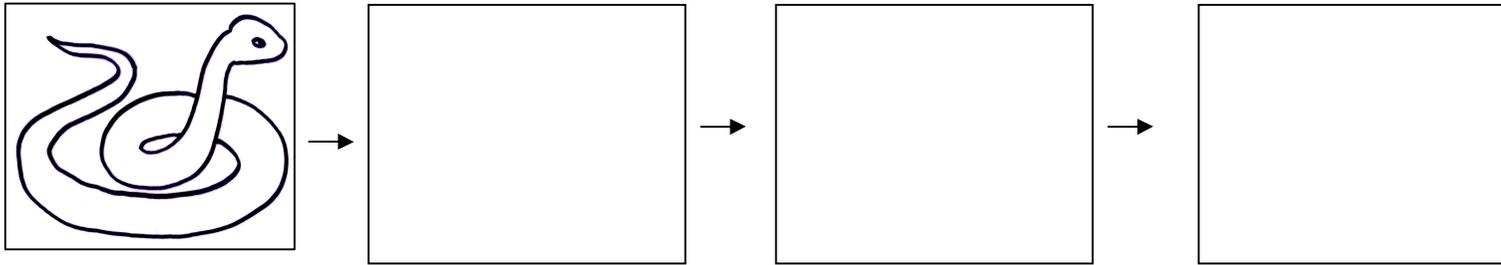

Entoure sur chaque ligne les carnivores.

Découpe les animaux et colle l'animal qui est mangé sous l'animal qui le mange.

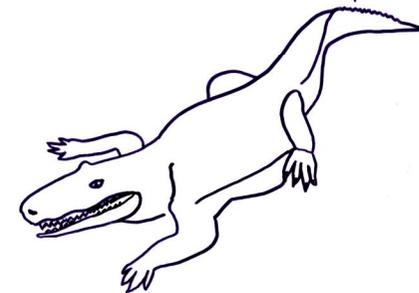

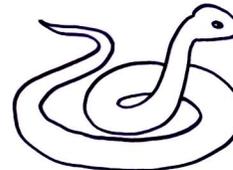

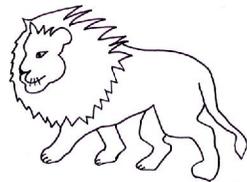

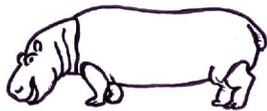

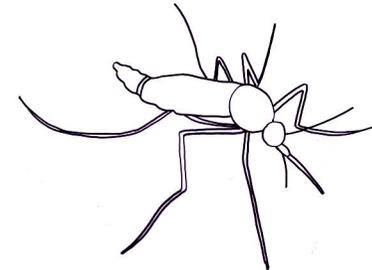

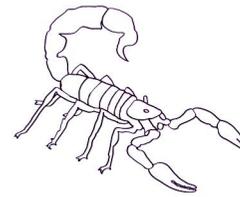

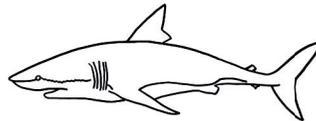

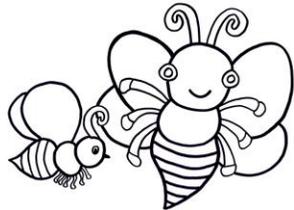

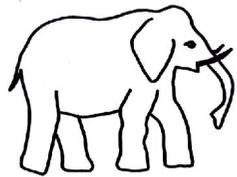

Qui mange qui ? Colle les étiquettes pour indiquer sur les schémas quel animal mange quel autre.

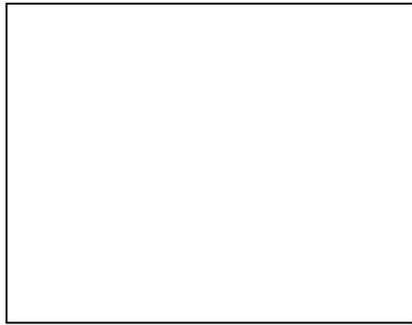

Voici les 10 animaux les plus dangereux pour l'homme : classe les du plus dangereux (celui qui cause le plus de morts parmi les humains) au moins dangereux.

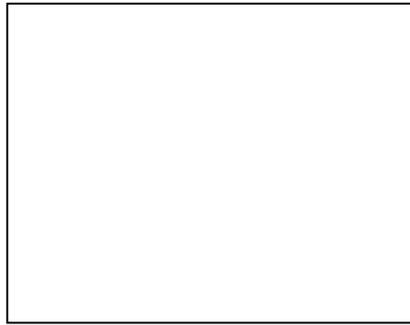

1	2	3	4	5
6	7	8	9	10

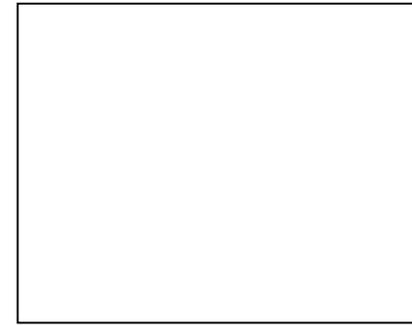

Classe ces animaux de celui qui vit le plus longtemps à celui qui vit le moins longtemps.

1

5

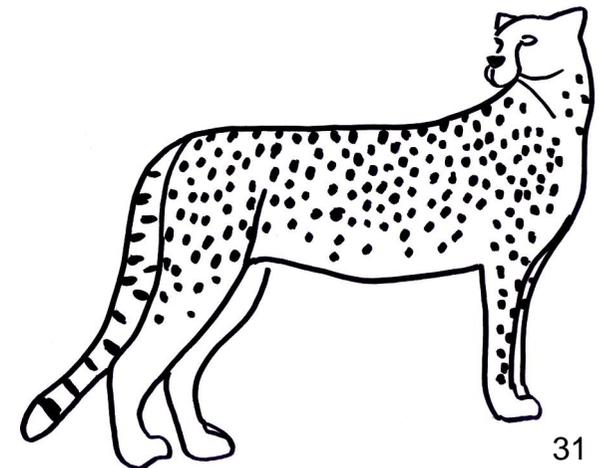

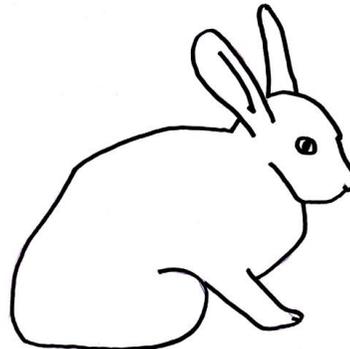

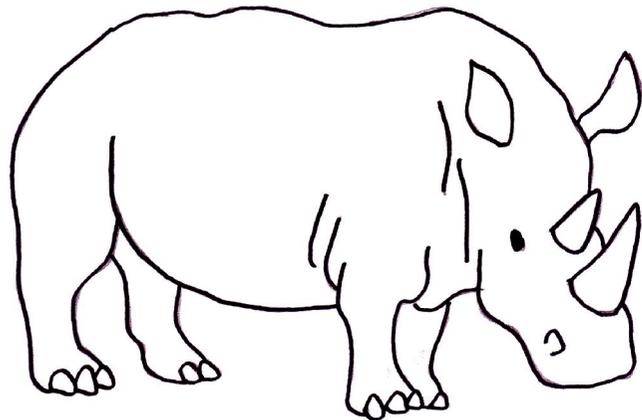

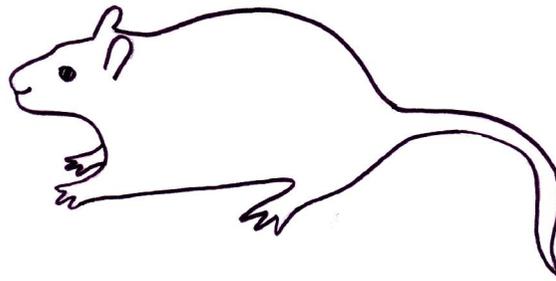

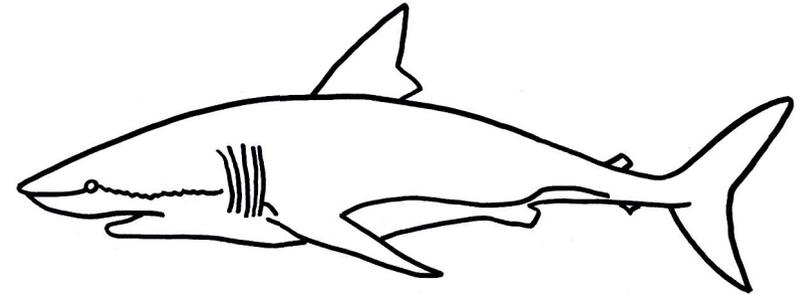

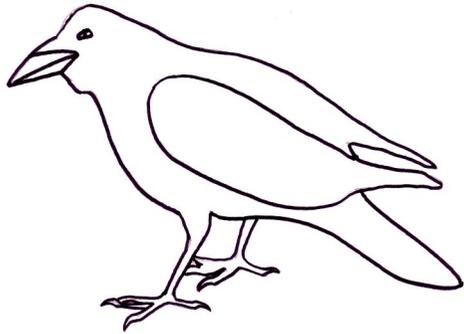

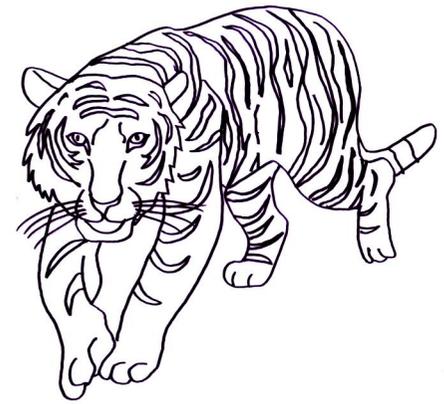

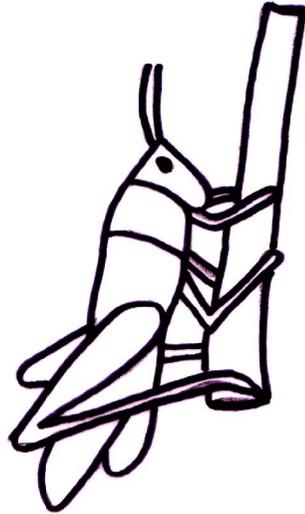

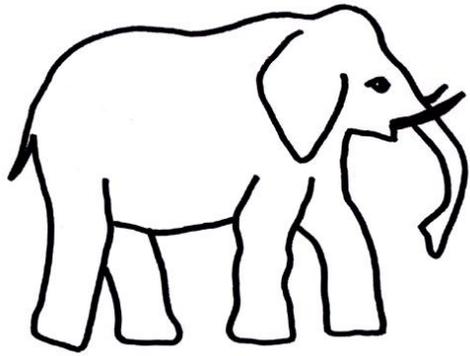

6

Réponses : 1 la tortue, 2 l'éléphant, 3 le requin, 4 le chien, 5 la souris, 6 le papillon

Colorie les espèces menacées par l'homme.

Fiche 5 Réponses : crabe, écrevisse, escargot, tortue

Fiche 6 Réponses : le koala (mammifère), le flamand rose (oiseau), la carpe (poisson), la grenouille (batracien), le serpent (reptile) sont des vertébrés et ont donc un squelette.

Fiche 9 Réponses : le phoque, le renne, le morse, le pingouin

Fiche 10 Réponses: : canard, chien, cochon, cheval, vache

Fiche 12 Réponses : amphibien : la grenouille ; oiseaux : le corbeau, l'autruche, mammifères : le gorille, le lapin ; reptile : le crocodile, poisson : la morue

Fiche 13 Réponses : échinoderme : l'étoile de mer, spongiaires et coelentérés : éponge et méduse, mollusque : escargot, crustacés : crabe, insecte : le moustique, annélide : le ver de terre

Fiche 14 Réponses : vautour, toucan, ibis, hibou, pigeon

Fiche 15 Réponses : dromadaire, koala, dauphin, cochon, cheval

Fiche 17 Réponses : cerf-volant, coccinelle, mouche, papillon, moustique et fourmi

Fiche 18 Réponses : mammifères marins : le phoque, la baleine, le dauphin, le morse.

Fiche 19 Réponses : la crevette, l'écrevisse, le crabe sont des crustacés, le poisson, la méduse et le scorpion n'en sont pas

Fiche 20 Réponses : guépard, faucon pèlerin, autruche, lièvre, impala

Fiche 21 Réponses : le lézard, le hérisson, la chauve-souris, la souris, la grenouille, la tortue.

Fiche 22 Réponses : vivent la nuit : la chauve-souris, le fennec, le hérisson, le sanglier, la chouette
Vivent le jour : poule, éléphant, vache, cheval, gorille

Fiche 23 Réponses : ovipares, c'est-à-dire qui pondent des œufs : crocodile, autruche, macareux, tortue, espadon

Fiche 24 Réponses : corbeau, ours, cochon, chien, rat sont omnivores, c'est-à-dire qu'ils mangent de tout, comme l'homme.

Fiche 25 Réponses : chèvres, lapin, hippopotame, girafe, vache, éléphant, gorille, cheval, wapiti, rhinocéros

Fiche 26 Réponses : lion, chien, tigre, guépard, chat, jaguar, vautour, loup, phoque, requin, dauphin

Fiche 27 Réponses : Le hérisson mange le serpent, le pingouin le poisson, la crevette arlequin l'étoile de mer, le lion le zèbre, la grenouille la mouche, le chat la souris, l'oiseau le ver de terre, et l'aigle le lièvre.

Fiche 28 Réponses : le serpent mange le hérisson, qui mange la grenouille qui mange la mouche.
L'aigle royal mange le renard, qui mange l'oiseau qui mange l'araignée, qui mange la coccinelle.

Fiche 29 Réponses : 1 moustique, 2 serpents, 3 scorpion, 4 crocodile, 5 éléphant, 6 abeille, 7 lion, 8 hippopotame, 9 méduse, 10 requins

Fiche 30 Réponses : 1 la tortue, 2 l'éléphant, 3 le requin, 4 le chien, 5 la souris, 6 le papillon

Fiche 31 Réponses : l'éléphant, le gorille, le requin, le jaguar, le tigre, le rhinocéros.
