Graphismes du monde entier

Ce fichier travaille le geste graphique à travers un tour du monde d'œuvres d'arts de tous les continents. Ces fiches sont l'occasion d'améliorer sa motricité fine tout en découvrant différents types de graphismes. Traits, ponts, boucles, spirales, ronds, vagues, formes géométriques... viennent décorer les dessins représentatifs de diverses cultures.

Les dessins sont réalisés par Carinne Duquenne, diplômée des Beaux-Arts et enseignante expérimentée de maternelle... Carinne allie son talent artistique et son expérience professionnelle pour concevoir des dessins et des graphismes adaptés aux enfants. Le fichier est créé en collaboration avec Anne-Marie Samoun, fondatrice du site webinstit.net et enseignante en grande section.

Des fiches de différents niveaux sont proposées, permettant de s'adapter à la progression des enfants. Elles travaillent des compétences variées : repasser sur un trait, compléter symétriquement, recopier, ajouter des éléments manquants, continuer un rythme. C'est volontairement qu'aucune consigne ne figure sur les fiches, car une fois terminées, elles se présentent comme un petit tableau avec un cadre. La consigne se donne oralement et peut être modulée selon le temps dont on dispose et le niveau des enfants.

Sommaire

AFRIQUE

- 1 gestes graphiques
- 2 tortue
- 3 statues humaines
- 4 masque allongé du Cameroun
- 5 masque de femme du Gabon
- 6 masque de buffle
- 7 Néfertiti (Egypte)
